

airports. The governments that still own many of them should be more open to privatisation to cover a \$ 78 billion funding gap in needed capital investments. Airlines, airports' biggest customers, see things differently. Costs at privatised terminals are higher and governments should be cautious about such actions in the interests of expanding the aviation sector as a whole. Privatising an airport does not necessarily make it more efficient. A study has found there was little difference between the performance of airports 100% owned by commercially-oriented government corporations and those majority controlled by private businesses. The key is instead to avoid structures where the incentives for managers are confused or misaligned, such as where private companies are brought in as minority investors or where managers are essentially bureaucrats swayed by political imperatives. There is a better solution out there, but it is not likely to be very attractive to incumbent airlines, airports, or passengers enamoured of the current generation of gleaming terminals : build more, cheaper airports.
