and Twitter quickly and securely and discreetly. Instead of starting from scratch you will build on the vast resources, data storage capacity, and familiar features of these platforms which have become part of everyday life for hundreds of millions of users worldwide. Beginning iOS Apps with Facebook and Twitter APIs introduces you to the development tools, techniques, and design practices you will need to work with the APIs. It helps you decide whether to use Facebook, Twitter, or both, and explains the important issues of design, branding, and permissible use guidelines. You will learn how to guarantee privacy and use OAuth for authentication and single sign on. Create news apps, shopping apps, contact apps, GPS apps, guides, and more that let users transparently sign on once, then freely work with and manage their Facebook and Twitter accounts. Publish game high scores, post likes, links, and status updates. Send messages, share pictures, and forward Tweets. Tweet a link to an event, show themselves as attending, and see who else is there. Show Tweets that are relevant to a topic within a news app. Show Tweets about a restaurant. Organize a group or community. From time to time, new forms of communication come along that make it easier for people to communicate and manage their social lives. Like phone calls and SMS before them, Facebook and Twitter have in a short time become essential parts of the social fabric of life for an ever-growing number of people throughout the world. The knowledge you will gain from Beginning iOS Apps with Facebook and Twitter APIs will help you create exciting and popular iOS apps that your users will rely on every day to help make their lives more meaningful and connected.

*Facebook Application Development* Nick Gerakines, 2008-05-05. The wildly popular Facebook social networking platform has published an open Application Programming Interface (API), and developers are eating it up: 60,000 signed up to use it in the first few days. With this API, any programmer can create applications and new features for Facebook. Explores and explains the components available to programmers, including working with Facebook Markup Language (FBML), querying Facebook with FQL, application layout and flow, advanced configuration and performance tuning, and more. Businesses such as NBC, Yahoo, Red Bull, Forbes, and the Washington Post are building branded applications to reach the growing Facebook community.
