

# Cooling Theory Lectures Notes

Markus Hupfer and members of the team!

September 7, 2024

These are the notes for the 2024 Summer Term of Cooling Theory. These are peer-reviewed and give insights on problems for all of the cooling game. Some are the proceedings with results on the lecture, the other contributions to Cooling Theory and the book of Hoffman and Peter Pridemore at the University of Illinois. I also used several other sources for additional material. Some are in Part II course book of Cambridge on Cooling Theory and Engineering given by Professor John Hupfer, and the other course notes from a Cambridge book on Submarine Transportation given by Professor Tim Givens. I also included some from David Fisher's 2021 course, Applied Math for the Film Production. The last source of the notes is based on Hugh Roberts course notes, "Graph Based Cooling".

All credits go to their authors and my team.
