A Touch Of Code Interactive Installations And Experiences:

A Touch of Code Robert Klanten, Sven Ehmann, Verena Hanschke, Lukas Feireiss, 2011 Today's designers are creating compelling atmospheres and interactive experiences by merging hardware and software with architecture and design. This book is a collection of this innovative work produced where virtual realms meet the real world and where dataflow confronts the human senses. It presents an international spectrum of interdisciplinary projects at the intersection of laboratory, trade show and urban space that play with the new frontiers of perception, interaction and staging created by current technology. The work reveals how technology is fundamentally changing and expanding strategies for the targeted use of architecture, art, communication and design for the future. [The Oxford Handbook of Interactive Audio](#) Karen Collins, Bill Kapralos, Holly Tessler, 2014 What does it mean to interact with sound? How does interactivity alter our experience as creators and listeners? What does the future hold for interactive musical and sonic experiences? This book answers these questions with newly commissioned chapters that explore the full range of interactive audio in games, performance, design and practice.
