Stuart Beadnall, Simon Moore, 2021-12-29 This updated book provides practical guidance on avoiding and resolving disputes
in the construction of offshore units and vessels including FPSOs drilling units OSVs FLNG FSRU and fixed platforms Written
by a leading team at Stephenson Harwood it covers the entire construction process from initial concept right through to
installation at each stage commenting on typical contract terms and offering expert advice based on real life examples With
30 per cent of the world's oil and gas production coming from offshore areas the construction of specialist vessels to perform
offshore operations is a crucial part of the industry However with exploration and production being performed in increasingly
exacting locations the scope for disputes arising from cost overruns scheduling delays and technical difficulties is immense
This second edition has been updated to include new case law as well as a new chapter on financing The existing chapters
will feature more information on payment mechanisms and on transportation and installation This unique text will be of
enormous assistance both to legal practitioners and offshore construction professionals including project managers

English abstract Based on module study requirement to demonstrate competence in commercial and technical leadership
throughout engineering project management and delivery of its outputs one of the projects completed for a State owned
Company SOC Passenger Rail Agency of South Africa PRASA SOC Limited has been selected for this purpose It included
reconnaissance site investigation pre feasibility and feasibility studies environmental impact assessment due diligence
analysis design specification and advisory on all Engineering aspects and disciplines from Concept development to
Completion of component Projects within the overarching modernisation project The project report framework model used is
based on New Engineering Contract NEC categorisation of contract by the Institution of Civil Engineers 1993 provisions for a
Separate Design and Construction Contract SDCC focussing per Smith N J 2002 on three project pillars of Cost Quality and
Time allocation to the project together with the associated risks and risk mitigation methods The agreed initial period was
two and one half years commencing in July 2012 An inclusive turn key Train station modernisation Capital fund allocation
and contract budget was 23 million The high level estimated final cost was in the region of 22 million The proportion
allocation for the mechanical and electrical portions stated above was to be below 30% of the total estimated final cost This
case study seeks to provide a balance between a selected executed project and how the approaches to project management

activities set out in the class module structure for this study is contrasted with the approaches negotiated in execution of this selected project
