**Framing Portraits, Binding Albums** Shilpi Goswami, Suryanandini Narain, (eds.), 2025-01-06 Long neglected in academic discourse in India family photographs make a silent contribution to the histories of photography marginality and the family In this volume the writers dwell on the importance of family photographs and their visual omnipresence in our daily lives They point out how family photographs have belonged to the vernacular material of visual culture more seen and lived with less written and consciously thought about Attempting to retrieve family photographs from a space of neglect this volume demonstrates how they are fundamental to the microhistories of a nation and its many societies and suggests the importance of such counterarguments to the dominant strains in an emerging discursive space The essays do not offer a comprehensive survey of all types of family photographs in India Instead they present focused insights into chosen areas of interest on the part of the writers Collectively they embrace the intersectionalities of gender caste class and regional trajectories making the politics of representation even more layered with contestations between the historical oral and affective memorialisation surrounding family archives and photographs These concerns centrally inform the essays as they accept and negotiate a terrain shared by all types of narrativisation
