implementation of Artificial Intelligence in Internet of Things Prepared for researchers and specialists who are interested in the use and integration of IoT and Artificial Intelligence technologies Artificial Intelligence for Knowledge Management, Energy and Sustainability Eunika Mercier-Laurent, Gülgün Kayakutlu, Mieczyslaw Lech Owoc, Abdul Wahid, Karl Mason, 2024-06-01 This volume IFIP AICT 693 constitutes the refereed proceedings of the 10th IFIP International Workshop on Artificial Intelligence for Knowledge Management AI4KMES 2023 from September 30th to October 1st 2023 held in Krakow Poland The 15 full papers presented together with 2 short papers were carefully reviewed and selected from 49 submissions The accepted papers covered a large scope of topics related to sustainability in various contexts such as smart cities agriculture energy and gas production and distribution industry management and biodiversity *Towards HRI of Everyday Life* Karolina Zawieska, Mohammad Obaid, Wafa Johal, Jessica Sorenson, Catharina Vesterager Smedegaard, Glenda Hannibal, 2025-10-03 Presently it is often assumed that at least in principle robots and social robots in particular have the potential to increase human well being across a wide range of sectors and application areas At the same time efforts to introduce such systems into our everyday environments have had only limited success and it is yet to be seen whether the impact of social robots on our daily lives professional and private will actually be beneficial Therefore there is a need to systematically address and study the long term use and presence of social robots in everyday environments where humans not only interact with robots but also have them integrated into the totality of their lived experiences in everyday life One of the main ways to investigate human engagement with social robots in everyday environments is through HRI studies conducted in the wild While such an approach has certainly been instrumental to and is increasingly used in HRI research we propose here to further expand the underlying theoretical and methodological frameworks to address the notion of everyday life The latter is viewed here as a useful concept and an umbrella term that allows us to address not only specific application domains for robots but also the continuity and totality of human lived experiences that emerge through long term engagement with social robots in everyday life contexts Placing social robots in everyday settings has often been an explicit goal for robot development however the notion of everyday life has yet to be systematically analysed and addressed in this context Therefore this Research Topic aims to bring together a wide range of disciplinary and interdisciplinary contributions to further develop the HRI domain The Historical City. A Critical Reference and Role Model Ilaria Cattabriga, Enrico Chinellato, Arshia Eghbali, Zeno Mutton, Ramona Loffredo, 2024-12-18 This book offers a multivocal and interdisciplinary arena that brings together a wide range of thoughts and approaches addressing the intricacies of dealing with the historical city today Spanning across a multitude of humanistic sociological and technological outlooks it provides a multifaceted overview of current research on the city and its historicity Based on revised and extended contributions presented at two international conferences namely The Historical City as a Critical Reference and Role Model for Innovative Urban and Metropolitan Development January 26 27 2023 and The Historical City as a Field for Critical Exercise Criticism Politics Actors April 17

2023 both held at the University of Bologna this book is an insightful and thought provoking read for researchers in Architecture History Urban Studies Social Sciences and the Arts as well as professionals and policy makers dealing with historical cities *Proceedings of the International Conference on AI Research* Carlos Goncalves, Jose Carlos Dias Rouco,
