

STAGES OF A CRIME INVESTIGATION: FROM PROBING THE CRIME SCENE TO PROSECUTING IN THE COURTROOM

Investigating a crime involves many processes carried out by a variety of professionals. Those stages can be categorized into three broad groups: on the scene of the crime, at the lab and in the courtroom.

ON THE SCENE AND IMMEDIATELY AFTER

Police officers are usually the first on the scene, where they may stop a crime in progress and apprehend offenders or suspects. If the crime was already committed, law enforcement personnel try to piece together exactly what happened.

Either way, they follow a process to gather evidence in support of a criminal charge and conviction.

POLICE OFFICERS MAY:

Stop a crime in progress

Apprehend offenders or suspects

Locate and question witnesses at the scene

Secure the scene

Crime scene investigators sometimes assist police officers or detectives in documenting the crime scene and gathering evidence.

A CSI, also called a forensic investigator or evidence technician, may be an experienced law enforcement officer or a civilian specifically trained in forensic science.

facilitated their error the person has in effect been unwittingly set up for failure by the organization This Brief explores an accident in policing as a framework for examining existing police practices Learning from Error in Policing describes a case of wrongful arrest from the perspective of organizational accident theory which suggests a single unsafe act in this case a wrongful arrest is facilitated by several underlying latent conditions that triggered the event and failed to stop the harm once in motion The analysis demonstrates that the risk of errors committed by omission failing to act were significantly more likely to occur than errors committed by acts of commission By examining this case policy implications and directions for future research are discussed The analysis of this case and the underlying lessons learned from it will have important implications for researchers and practitioners in the policing field
