Discrete-event System Simulation Jerry Banks, 2010 For junior and senior level simulation courses in engineering business or computer science Discrete Event System Simulation examines the principles of modeling and analysis that translate to all software tools rather than a particular software tool This language independent text explains the basic aspects of the technology including the proper collection and analysis of data the use of analytic techniques verification and validation of models and designing simulation experiments It offers an up to date treatment of simulation of manufacturing and material handling systems computer systems and computer networks Students and instructors will find a variety of resources including simulation source code for download additional exercises and solutions web links and errata at the associated website <http://dmnicol.web.engr.illinois.edu/bcnn/index.html>

Organizational Simulation William B. Rouse, Kenneth R. Boff, 2005-07-08 From modeling and simulation to games and entertainment With contributions from leaders in systems and organizational modeling behavioral and social sciences computing and visualization and gaming and entertainment Organizational Simulation both articulates the grand vision of immersive environments and shows in detail how to realize it This book offers unparalleled insight into the cutting edge of the field since it was written by those who actually researched designed developed deployed marketed sold and critiqued today s best organizational simulations The coverage is divided into four sections Introduction outlines the need for organizational simulation to support strategic thinking design of unprecedented systems and organizational learning including the functionality and technology required to enable this support Behaviors covers the state of knowledge of individual group and team behaviors and performance how performance can best be supported how performance is affected by national differences and how organizational performance can best be measured Modeling describes the latest approaches to modeling and simulating people groups teams and organizations as well as narrative contexts and organizational environments within which these entities act drawing from a rich set of modeling methods and tools Simulations and Games illustrates a wide range of fielded simulations games and entertainment including the methods and tools employed for designing developing deploying and evaluating these systems as well as the social implications for the associated communities that have emerged Addressing all levels of organizational simulation architecture with theories and applications and enabling technologies for each Organizational Simulation offers students and professionals the premier reference and practical toolbox for this dynamic field

Building QoS into Distributed Systems Andrew T. Campbell, Klara Nahrstedt, 2013-06-29 Welcome to IWQOS 97 in New York City Over the past several years there has been a considerable amount of research within the field of Quality of Service QoS Much of that work has taken place within the context of QoS support for distributed multimedia systems operating systems transport subsystems networks devices and formal languages The objective of the Fifth International Workshop on Quality of Service IWQOS is to bring together researchers developers and practitioners working in all facets of QoS research While many

workshops and conferences offer technical sessions on the topic QOS none other than IWQOS provide a single track workshop dedicated to QOS research The theme of IWQOS 97 is building QOS into distributed systems Implicit in that theme is the notion that the QOS community should now focus on discussing results from actual implementations of their work As QOS research moves from theory to practice we are interested in gauging the impact of ideas discussed at previous workshops on development of actual systems While we are interested in experimental results IWQOS remains a forum for fresh and innovative ideas emerging in the field As a result of this authors were solicited to provide experimental research long papers and more speculative position short statements for consideration We think we have a great invited and technical program lined up for you this year The program reflects the Program Committees desire to hear about experiment results controversial QOS subjects and retrospectives on where we are and where we are going
