Control System By Goyal :

Soft Computing and Signal Processing Jiacun Wang,G. Ram Mohana Reddy,V. Kamakshi Prasad,V. Sivakumar Reddy,2019-02-13 The book includes research papers on current developments in the field of soft computing and signal processing selected from papers presented at the International Conference on Soft Computing and Signal Processing ICSCSP 2018 It features papers on current topics such as soft sets rough sets fuzzy logic neural networks genetic algorithms and machine learning It also discusses various aspects of these topics like technologies product implementation and application issues

Primer to Neuromorphic Computing Harish Garg,Jyotir Moy Chatterjee,R Sujatha,Shatrughan Modi,2024-11-09 Primer to Neuromorphic Computing highlights critical and ongoing research into the diverse applications of neuromorphic computing It includes an overview of primary scientific concepts for the research topic of neuromorphic computing such as neurons as computational units artificial intelligence machine learning and neuromorphic models It also discusses the fundamental design method and organization of neuromorphic architecture Hardware for neuromorphic systems can be developed by exploiting the magnetic properties of different materials These systems are more energy efficient and enable faster computation Magnetic tunnel junctions and magnetic textures can be employed to act as neurons and synapses Neuromorphic systems have general intelligence like humans as they can apply knowledge gained in one domain to other domains Discusses potential neuromorphic applications in computing Presents current trends and models in neuromorphic computing and neural network hardware architectures Shows the development of novel devices and hardware to enable neuromorphic computing Offers information about computation and learning principles for neuromorphic systems Provides information about Neuromorphic implementations of neurobiological learning algorithms Discusses biologically inspired neuromorphic systems and devices including adaptive bio interfacing and hybrid systems consisting of living matter and synthetic matter

Advances in Data and Information Sciences Mohan L. Kolhe,Shailesh Tiwari,Munesh C. Trivedi,Krishn K. Mishra,2020-01-02 This book gathers a collection of high quality peer reviewed research papers presented at the 2nd International Conference on Data and Information Sciences ICDIS 2019 held at Raja Balwant Singh Engineering Technical Campus Agra India on March 29 30 2019 In chapters written by leading researchers developers and practitioner from academia and industry it covers virtually all aspects of computational sciences and information security including central topics like artificial intelligence cloud computing and big data Highlighting the latest developments and technical solutions it will show readers from the computer industry how to capitalize on key advances in next generation computer and communication technology

Interpolatory Methods for Model Reduction A. C. Antoulas,C. A. Beattie,S. Gü?ercin,2020-01-13 Dynamical systems are a principal tool in the modeling prediction and control of a wide range of complex phenomena As the need for improved accuracy leads to larger and more complex dynamical systems direct simulation often becomes the only available strategy for accurate prediction or control inevitably creating a considerable

burden on computational resources This is the main context where one considers model reduction seeking to replace large systems of coupled differential and algebraic equations that constitute high fidelity system models with substantially fewer equations that are crafted to control the loss of fidelity that order reduction may induce in the system response Interpolatory methods are among the most widely used model reduction techniques and Interpolatory Methods for Model Reduction is the first comprehensive analysis of this approach available in a single extensive resource It introduces state of the art methods reflecting significant developments over the past two decades covering both classical projection frameworks for model reduction and data driven nonintrusive frameworks This textbook is appropriate for a wide audience of engineers and other scientists working in the general areas of large scale dynamical systems and data driven modeling of dynamics **Fog Data**

Analytics for IoT Applications Sudeep Tanwar,2020-08-25 This book discusses the unique nature and complexity of fog data analytics FDA and develops a comprehensive taxonomy abstracted into a process model The exponential increase in sensors and smart gadgets collectively referred as smart devices or Internet of things IoT devices has generated significant amount of heterogeneous and multimodal data known as big data To deal with this big data we require efficient and effective solutions such as data mining data analytics and reduction to be deployed at the edge of fog devices on a cloud Current research and development efforts generally focus on big data analytics and overlook the difficulty of facilitating fog data analytics FDA This book presents a model that addresses various research challenges such as accessibility scalability fog nodes communication nodal collaboration heterogeneity reliability and quality of service QoS requirements and includes case studies demonstrating its implementation Focusing on FDA in IoT and requirements related to Industry 4 0 it also covers all aspects required to manage the complexity of FDA for IoT applications and also develops a comprehensive taxonomy

Emerging Research in Computing, Information, Communication and Applications N. R. Shetty,L. M. Patnaik,H. C. Nagaraj,Prasad Naik Hamsavath,N. Nalini,2019-05-02 This book presents selected papers from the International Conference on Emerging Research in Computing Information Communication and Applications ERCICA 2018 The conference provided an interdisciplinary forum for researchers professional engineers and scientists educators and technologists to discuss debate and promote research and technology in the emerging areas of computing information communication and their applications The book discusses these research areas providing a valuable resource for researchers and practicing engineers alike

Feeding Tomorrow Ecologically David S-K. Ting, Jacqueline A. Stagner, 2025-09-08 Feeding Tomorrow Ecologically serves to support the top three SDGs No Poverty Zero Hunger and Good Health and Well Being Chapter authors delve into multifaceted aspects of global food systems providing a comprehensive overview of challenges and innovations in shaping the future of food production and sustainability

Embedded Artificial Intelligence Arpita Nath Boruah, Mrinal Goswami, Manoj Kumar, Octavio Loyola-González, 2025-03-28 This book explores the role of embedded AI in revolutionizing industries such as healthcare transportation manufacturing and retail It begins by introducing the fundamentals of AI and embedded systems and specific challenges and opportunities A key focus of this book is developing efficient and effective algorithms and models for embedded AI systems as embedded systems have limited processing power memory and storage It discusses a variety of techniques for optimizing algorithms and models for embedded systems including hardware acceleration model compression and quantization Key features Explores security experiments in emerging post CMOS technologies using AI including side channel attack resistant embedded systems Discusses different hardware and software platforms available for developing embedded AI applications as well as the various techniques used to design and implement these systems Considers ethical and societal implications of embedded AI vis a vis the need for responsible development and deployment of embedded AI systems Focuses on application based research and case studies to develop embedded AI systems for real life applications Examines high end parallel systems to run complex AI algorithms and comprehensive functionality while maintaining portability and power efficiency This reference book is for students researchers and professionals interested in embedded AI and relevant branches of computer science electrical engineering or artificial intelligence
