Regional Queen Conch Fisheries Management and Conservation

Plan Food and Agriculture Organization of the United Nations, 2017-01-01. The Regional Queen Conch Fishery Management and Conservation Plan was formulated with the following specific objectives:

1. To improve the collection and integration of scientific data needed to determine the overall queen conch population status as the basis for the application of ecosystem-based management.
2. To harmonize measures aimed at increasing the stability of the queen conch population and to implement best management practices for a sustainable fishery.

Child Labour and School Enrolment Horst Friedrich Rolly, 2019-08-16

This book reflects the outcome of a long-term involvement in issues of child labour, non-formal education, and formal school enrolment. It documents research findings and practical experiences on social, economic, and cultural causes of child labour and various pragmatic and theory-guided methods, as well as legal instruments to combat child labour. The tenet that quality schooling prevents child labour implies a shift in child labour monitoring from a conventional controlling approach at workplaces to a community-based enabling approach at schools. Child labour and school enrolment are not isolated phenomena that can be strategically resolved under controlled conditions in the human lifeworld but are rather positioned, reflected, and acted upon in the context of a handed-down and existing system. Universal human rights instruments, including educational rights, offer directives to resolve problematic settings that prevailed over time; however, they require an unequivocal commitment which is not always the case in the ground reality of pluralistic stakeholders divided by conflicting group interests.
