

HRM CASE STUDY

Point out which changes are occurring in the business that affect HRM.

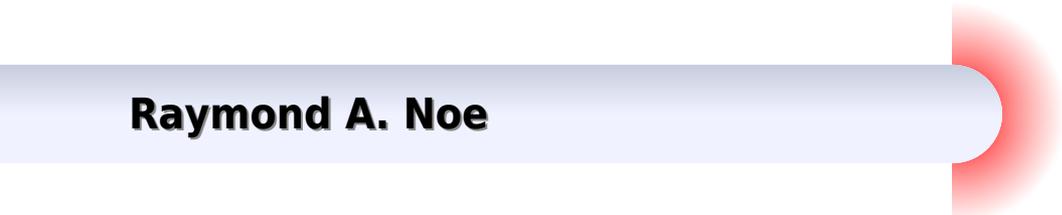

1. 50% of the experienced employees, who provided a unique historical perspective to the company are retiring in the next three years. This will affect the overall revenue increase expected over the next three years.
2. Change in work style: The owner wants to implement telecommute to the work for 2 days in a week. HRM must evaluate the possibility of adverse results in productivity.
3. The owner has plans to completely close the physical building and let employees work from home. HRM must evaluate ability of employees to communicate and level of motivation in such a virtual organization.
4. The owner has considered to cut off all health benefits completely. HRM has to advise if it's a good idea or not.
5. The owner wants to have her employees work for her on contract basis instead of full-time. HRM has to advise if it's a good idea or not.

What are some considerations the company and HR should be aware of when making changes related to this case study?

1. The employees retiring from an organization is very normal and all companies must have a plan to mitigate the reduction in productivity arising from it. They must plan for new recruitments and company should request support from senior employees to train the new recruits for smooth transition.
2. The change in work style must be implemented gradually. The employees must be consulted about this change and encouraged to share their thoughts. From previous case studies among companies, employees are interested to work in a different environment for two days in a week.
3. The plan to close physical building completely should be considered after looking at results from the above "2 days tele commute style". We would be able to gather and look at more data with this method.
4. Health benefits cancellation would likely lower the motivation of employees. It will create an insecurity for them. Furthermore, HRM must look at local laws and regulations that might state mandatory health benefits to the employees.

Internationalisation in the Cloud. An explorative case study into the foreign market expansion of SaaS providers Christina Küppers, 2017-07-17 Master's Thesis from the year 2016 in the subject Business economics Business Management Corporate Governance grade 1.0 Copenhagen Business School Department of Intercultural Communication and Management language English abstract This thesis investigates the internationalisation complexities of cloud technology vendors To enhance the understanding of foreign market expansion of cloud providers this study sought to answer the overarching research questions how do cloud providers internationalise and is available literature to date still relevant for cloud technology vendors The researchers utilised a single case study of NN an expanding Danish cloud SME to provide in-depth insights for the business literature realm which has so far attracted scarce research Literature has focused almost exclusively on SMEs MNCs and born globals but cloud providers were mostly ignored To date little systematic investigations have considered that the dynamics and processes of internationalisation significantly change in a cloud context The most important contribution is a research model encompassing twelve moderator variables impacting the performance of cloud firms Their suggested influence was drawn from a thorough theoretical analysis of contemporary internationalisation literature from the 1950s to the present day Thereby both versions of the Uppsala Model of Internationalisation by Johanson and Vahlne 1977 2009 were selected as suitable to provide structure for the research model namely the process model and the network model Complementing the four categories of the Uppsala Model the research model was enhanced with two additional categories so as to examine cloud vendor internationalisation Using a sample of five employees who are directly responsible for internationalisation activities of the case company NN this thesis offers interesting insights into the complexities of cloud internationalisation The findings illustrate that internationalisation literature to date is still useful for examining internationalisation performance and in particular the network model However since cloud vendors mainly operate virtually this brings forth many advantages and disadvantages which have previously not been considered Theoretical contributions and implications for future research are discussed This thesis provides support for ten out of twelve items and offers various compelling areas for future research
