Improving Instruction in Rational Numbers and Proportionality Margaret Schwan Smith, Edward A. Silver, Mary Kay Stein, 2005-01-01 Helping students develop an understanding of important mathematical ideas is a persistent challenge for teachers In this book one of a three volume set well known mathematics educators Margaret Smith Edward A Silver and Mary Kay Stein provide teachers of mathematics the support they need to improve their instruction They focus on ways to engage upper elementary middle school and high school students in thinking reasoning and problem solving to build their mathematics understanding and proficiency The content focus of Volume One is rational numbers and proportionality Using materials that were developed under the NSF funded COMET Cases of Mathematics to Enhance Teaching program each volume in the set features cases from urban middle school classrooms with ethnically racially and linguistically diverse student populations Each case illustrates an instructional episode in the classroom of a teacher who is implementing standards based instruction the teachers perspective including their thoughts and actions as they interact with students and with key aspects of mathematical content cognitively challenging mathematics activities that are built around samples of authentic classroom practice and facilitation chapters to help professional developers teach the cases including specific guidelines for facilitating discussions and suggestions for connecting the ideas presented in the cases to a teacher's own practice As a complete set this resource provides a basis on which to build a comprehensive professional development program to improve mathematics instruction and student learning

Maths Higher Fiona Mapp, 2006 This volume contains everything students need to know for Key Stage 3 higher maths The text is laid out in sound bite boxes to aid recollection with clearly labelled diagrams to add visual clarity and further demonstrate the subject matter

Small Teaching James M. Lang, 2016-02-16 Employ cognitive theory in the classroom every day Research into how we learn has opened the door for utilizing cognitive theory to facilitate better student learning But that's easier said than done Many books about cognitive

theory introduce radical but impractical theories failing to make the connection to the classroom In *Small Teaching* James Lang presents a strategy for improving student learning with a series of modest but powerful changes that make a big difference many of which can be put into practice in a single class period These strategies are designed to bridge the chasm between primary research and the classroom environment in a way that can be implemented by any faculty in any discipline and even integrated into pre existing teaching techniques Learn for example How does one become good at retrieving knowledge from memory How does making predictions now help us learn in the future How do instructors instill fixed or growth mindsets in their students Each chapter introduces a basic concept in cognitive theory explains when and how it should be employed and provides firm examples of how the intervention has been or could be used in a variety of disciplines Small teaching techniques include brief classroom or online learning activities one time interventions and small modifications in course design or communication with students
