Practical Statistics for Environmental and Biological Scientists John Townend,2013-04-30 All students and researchers in environmental and biological sciences require statistical methods at some stage of their work Many have a preconception that statistics are difficult and unpleasant and find that the textbooks available are difficult to understand Practical Statistics for Environmental and Biological Scientists provides a concise user friendly non technical introduction to statistics The book covers planning and designing an experiment how to analyse and present data and the limitations and assumptions of each statistical method The text does not refer to a specific computer package but descriptions of how to

carry out the tests and interpret the results are based on the approaches used by most of the commonly used packages e.g. Excel MINITAB and SPSS Formulae are kept to a minimum and relevant examples are included throughout the text

Practical Statistics for Data Scientists Peter C. Bruce, Andrew Bruce, 2017 Statistical methods are a key part of data science yet very few data scientists have any formal statistics training Courses and books on basic statistics rarely cover the topic from a data science perspective This practical guide explains how to apply various statistical methods to data science tells you how to avoid their misuse and gives you advice on what's important and what's not Many data science resources incorporate statistical methods but lack a deeper statistical perspective If you're familiar with the R programming language and have some exposure to statistics this quick reference bridges the gap in an accessible readable format With this book you'll learn Why exploratory data analysis is a key preliminary step in data science How random sampling can reduce bias and yield a higher quality dataset even with big data How the principles of experimental design yield definitive answers to questions How to use regression to estimate outcomes and detect anomalies Key classification techniques for predicting which categories a record belongs to Statistical machine learning methods that learn from data Unsupervised learning methods for extracting meaning from unlabeled data Provided by publisher [Practical Statistics for Field Biology](#) Jim Fowler, Lou Cohen, Philip Jarvis, 2013-06-20 Provides an excellent introductory text for students on the principles and methods of statistical analysis in the life sciences helping them choose and analyse statistical tests for their own problems and present their findings An understanding of statistical principles and methods is essential for any scientist but is particularly important for those in the life sciences The field biologist faces very particular problems and challenges with statistics as real life situations such as collecting insects with a sweep net or counting seagulls on a cliff face can hardly be expected to be as reliable or controllable as a laboratory based experiment Acknowledging the peculiarities of field based data and its interpretation this book provides a superb introduction to statistical analysis helping students relate to their particular and often diverse data with confidence and ease To enhance the usefulness of this book the new edition incorporates the more advanced method of multivariate analysis introducing the nature of multivariate problems and describing the techniques of principal components analysis cluster analysis and discriminant analysis which are all applied to biological examples An appendix detailing the statistical computing packages available has also been included It will be extremely useful to undergraduates studying ecology biology and earth and environmental sciences and of interest to postgraduates who are not familiar with the application of multivariate techniques and practising field biologists working in these areas [Practical Statistics](#) David Kremelberg, 2010-03-18 Making statistics and statistical software accessible and rewarding This book provides readers with step by step guidance on running a wide variety of statistical analyses in IBM SPSS Statistics Stata and other programs Author David Kremelberg begins his user friendly text by covering charts and graphs through regression time series analysis and factor analysis He provides a background of the method then explains

how to run these tests in IBM SPSS and Stata He then progresses to more advanced kinds of statistics such as HLM and SEM where he describes the tests and explains how to run these tests in their appropriate software including HLM and AMOS This is an invaluable guide for upper level undergraduate and graduate students across the social and behavioral sciences who need assistance in understanding the various statistical packages

Practical Statistics by Example Using Microsoft Excel and MINITAB Terry Sincich,David M. Levine,David Stephan,2002 This book CD ROM text for an introductory statistics course focuses on principles that are important for non statistics majors Each new concept is introduced and illustrated with real examples from various disciplines that demonstrate how to solve various types of statistical problems Examples are accompanied by graphs and output for a focus on analysis and interpretation The spreadsheet application Microsoft Excel and the statistical software MINITAB are integrated throughout the text and tutorials on both are offered Students are assumed to have a background in college algebra Learning features include self tests and key formulas symbols and terms The author is affiliated with the University of South Florida Annotation copyrighted by Book News Inc Portland OR
