Science Experiments Children Framework:

Project Zero Frameworks for Early Childhood Education: Project Spectrum : early learning activities Howard Gardner, David Henry Feldman, Mara Krechevsky, Jie-Qi Chen, 1998-11-13 The groundbreaking work of Harvard University psychologist Howard Gardner on multiple intelligences and Tufts University psychologist David Henry Feldman on nonuniversal development is fast becoming the standard by which children's intelligence and cognitive development is understood. In this landmark three volume set Mara Krechevsky and her colleagues at Project Zero make these insights available for both teachers and scholars alike. This curriculum resource provides enriching activities in a wide variety of disciplines including mechanics and construction, movement and music. *A Head Start on Science* William C. Ritz, 2007-06 For the littlest scientists the whole wide world can be a laboratory for learning. Nurture their natural curiosity with *A Head Start on Science* a treasury of 89 hands on science activities specifically for children ages 3 to 6. The activities are grouped into seven stimulating topic areas: the five senses, weather, physical science, critters, water and water mixture, seeds and nature walks. Because the activities have been field tested by more than a thousand Head Start teachers over 10 years you'll find this collection unusually easy to use in a variety of settings including elementary schools, pre-K programs and day care. In addition to clear background and a helpful materials list you get step by step procedures and help preparing for comments and questions children may pose. Each activity ends with a reproducible Family Science Connection in both English and Spanish to send home so the whole family can share a learning experience that's both simple and pleasant. Thanks to a focus on the fun of exploration and discovery children probably won't be the only ones who find these activities irresistible. As Editor Bill Ritz writes in the Introduction: We hope your own sense of wonder will be heightened as you observe children and as their curiosity leads them to answer their own questions about everything they see, hear, smell and touch.
