Education Outside the Classroom Great Britain. Parliament. House of Commons. Education and Skills Committee, 2005
The Committees report examines the wide range of outdoor learning experiences from lessons held within school grounds to residential expeditions abroad and considers the place of outdoor learning in the curriculum from foundation stage to higher education Issues discussed include the value of outdoor learning and the decline of opportunities for educational opportunities outside the classroom the barriers that deter schools from teaching outside the classroom including perceptions of risks in school trips the resources and curriculum time available for such trips availability and costs involved policy options for the Department for Education and Skills to help encourage schools improve and expand provision for outdoor learning and funding implications The Committees recommendations include that the DfES should issue a Manifesto for Outdoor Learning which gives all students the right to outdoor learning and which should attract a similar funding level to the music manifesto around 30 million in order to deliver real change *A Countryside For All* Michael Sissons, 2011-08-31 The rural fuse has been lit The countryside is tinder dry Post offices and banks shops and schools are closing Farmers are going out of business Houses are becoming unaffordable as prices soar ad poverty grows Pollution and over exploitation are destroying landscapes Many rural communities are on the verge of collapse Some fear the foot and mouth crisis will prove to be the last straw This book offers disturbing evidence of the background to the crisis *A Countryside For All* is a rallying cry for action pointing ways towards a prescription for the future This volume tackles many of the issues in a variety of new and original ways Possibly the most controversial and radical call is for the creation of a Department for the Countryside with a Secretary of State for the Countryside who would be responsible for setting a coherent set of policies to reverse the decline of rural Britain This timely book outlines the main problems facing the countryside and starts to bring together a balanced range of proposals Thought provoking filled with common sense often controversial but always fascinating it points the way forward for the countryside and for town and country as a whole **Professional Practice for Landscape Architects** Nicola Garmory, Clare Winsch, Rachel Tennant, 2007-03-15 This book organised in an extremely user friendly manner equips the landscape architect with all of the required knowledge in business and law It is of great value to Landscape architects throughout their academic and professional life Landscape architecture students will find this book vital to their education and it will also be useful for landscape students on non professional programmes who wish to understand the regulatory and planning backgrounds to their studies and for students on technical type landscape programmes It is compulsory reading for everyone preparing for the new Pathway to Chartership examination Not only will it help you pass the exam but you will along with the thousands of fully qualified landscape architects in the UK find it an extremely time saving reference in your busy working lives Proceedings of the Annual Conference of the Reading University Agricultural Club Reading University Agricultural Club. Geographies of Agriculture Guy Robinson,2014-01-14 Agricultural Geography has changed dramatically in recent decades reflecting the transformation of the farming industry itself Geographies of Agriculture embraces these changes applying ideas and methods from contemporary social science as it moves beyond farm based production to address current issues affecting the production and consumption of food and fibre throughout the world The book places special emphasis on topics that reflect globalisation processes integration of agriculture into the wider agri food system concern with attaining sustainable production systems and the importance of both government and supra government policies Examples are drawn from North America Western Europe and the developing world Geographies of Agriculture will appeal especially to

Geography students but should also be of interest to a broader range of students in Sociology Economics and Development Studies and anyone interested in agriculture food production and consumption and rural development ECOS ,1992
