Programming with Python for Engineers Sinan Kalkan, Onur T. Şehitoğlu, Göktürk Üçoluk, 2024-08-19 This book introduces computing and programming with undergraduate engineering students in mind. It uses Python Version 3 as the programming language chosen for its simplicity, readability, wide applicability, and large collection of libraries. Important features of the book include the following: The book contains interactive content for illustration of important concepts where the user can provide input and by clicking buttons trace through the steps. Each chapter is also accessible as a Jupyter Notebook page and every code piece is executable. This allows the readers to run code examples in chapters immediately to make changes and gain a better grasp of the concepts presented. The coverage of topics is complemented by illustrative examples and exercises.
