

# CHAPTER 4

## RESEARCH METHODS

### CHAPTER OVERVIEW

This chapter outlines components of the research process in abnormal psychology. These components include the establishment of a testable hypothesis; protection of internal validity; types of research design (i.e., case study, correlational, group and single-case experimental design, genetic linkage and analysis, cross-sectional, and longitudinal designs); the role of cultural factors that impinge upon research; and research ethics. This chapter examines methods developed to discover what behaviors constitute problems, why people engage in behavioral disorders (etiology), and what constitutes effective treatments and beneficial treatment outcome.

### LEARNING OBJECTIVES

1. Describe the basic components of research, including the distinction between a hypothesis and a testable hypothesis, independent and dependent variables, internal and external validity, and statistical and clinical significance.
2. Compare and contrast different research designs (e.g., case study, correlational, group and single-case experimental designs), including the types of questions that are appropriate/inappropriate for each.
3. Explain the aims and purposes of behavioral genetics, including the advantages and disadvantages of family, adoption, twin, and genetic linkage analysis and association studies.
4. Compare and contrast the assets and liabilities of cross-sectional designs versus longitudinal designs.
5. Explain the general place of cultural and ethical principles in the research process.
6. Explain how studying behavior over time and across cultures fits within research design and the research process more generally.
7. Describe the nature and function of replication in research, and distinguish a program of research from research that is not programmatic.

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts.

The Secret History is a masterful and suspenseful novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
