[The Virtualization Cookbook for IBM Z Volume 2: Red Hat Enterprise Linux 8.2](#) Lydia Parziale,Murthy Garimella,Eric Marins,Filipe Miranda,Paul Novak,Vinodkumar Ramalingam,IBM Redbooks,2021-10-19 This IBM Redbooks publication is Volume 2 of a five volume series of books entitled The Virtualization Cookbook for IBM Z This volume includes the following chapters

Chapter 1 Installing Red Hat Enterprise Linux on LNXADMIN on page 3 describes how to install and configure Red Hat Enterprise Linux onto the Linux Administration server which performs the cloning and other tasks

Chapter 2 Automated Red Hat Enterprise Linux installations by using Kickstart on page 37 describes how to use Red Hat s kickstart tool to create Linux systems This tool is fundamentally different from cloning in that an automated installation is implemented You can try kickstart and cloning Understand that these applications attempt to accomplish the same goal of quickly getting Linux systems up and running and that you do not need to use both

Chapter 3 Working with subscription manager yum and DaNdiFied on page 47 describes how the Red Hat Network works It provides centralized management and provisioning for multiple Red Hat Enterprise Linux systems Kickstart is an easy and fast way to provision your Linux guests in any supported Linux platform It re creates the operating system from the beginning by using the kickstart profile configuration file that installs the new operating system unattended It also sets up the new guest according to the definition that was set up in the kickstart file Usually Linux is administered by the same team that manages Linux on all platforms By using kickstart you can create a basic profile that can be used in all supported platforms and customize Linux profiles as needed

Cloning requires a better understanding of the z VM environment and z VM skills It is a fast process if you enable the IBM FlashCopy feature in advance It clones the disks from a golden image to new disks that are used by the new Linux guest The process can be automated by using the cloning scripts that are supplied with this book It is recommended that you start with The Virtualization Cookbook for IBM Z Volume 1 IBM z VM 7 2 SG24 8147 of this series because the IBM z VM hypervisor is the foundation or base layer for installing Linux on IBM Z
