The purpose of this study is to evaluate international industrial experience in using formal methods. The cases selected are representative of industrial grade projects and span a variety of application domains. The study had three main objectives: To better inform deliberations within industry and government on standards and regulations; To provide an authoritative record on the practical experience of formal methods to date; and To suggest areas where future research and technology development are needed. This study was undertaken by three experts in formal methods and software engineering: Dan Craigen of ORA Canada, Susan Gerhart of Applied Formal Methods, and Ted Ralston of Ralston Research Associates.
