**Resources in Education** ,1997      **Emotional Intelligence for Kids** George Smith,2021-09-17 Your child lives in a very complicated social world This has always been true for children all parents can remember their own tears or rage at the cruelty of another child all parents can desperately remember to want to be accepted and approved by other children Most of us can remember at some point in our lives yearning for a best friend Things are even more complicated for children now as the media has introduced children into the world of adult allelics before they are emotionally ready Our children don t know just instinctively how to build good relationships with other children in a culture like this to change the rules Fortunately

healthy children generally make healthy choices even in the context of hard to match situations That means that if children have good relationships at home they have a healthy advantage but they still need their help to learn how to navigate a complex social world Developing emotional intelligence in childhood provides an important foundation for good mental health throughout a child's life and increases their chances of having lasting and healthy relationships with those around them Emotional intelligence improves a person's resilience helping them to quickly recover from setbacks and disappointments They are also more likely to have a good set of values that guide their behavior toward others For children evidence has shown that learning these skills means they are better able to make and maintain healthy friendships and deal with bullying in positive and appropriate ways Research shows that children do better in school when they are emotionally and socially conscious They are also much less likely to become a bully and can work through negative emotions such as sadness anger fear anxiety and frustration What can parents do Children are not born with these skills emotional intelligence and social intelligence they learn them from their parents brothers and sisters family members caregivers and friends as they grow up Evidence suggests that the period from birth to early school age is critical to developing these skills The role of parents in building social and emotional intelligence is critical and there is much parents can do to develop these skills and encourage their children's development One of the most important ways children learn behaviors and abilities is by observing their parents Modeling good behavior and demonstrating healthy relationships shows kids how social and emotional skills work Parents should work to build their own strong friendships and to provide good examples of interaction with people both friends and strangers on a daily basis Showing how to deal with errors setbacks and problems is also important Observing how you address these situations can be a good learning opportunity for kids Do you want your child to want to cooperate without screaming bribery threats or punishment Would you like to connect more with your child to build a stronger sweeter bond instead of fighting for control Do you want to raise children who grow up in happy considerate responsible and competent people Want to know how to raise a 21st century child using eternal values Do you want to feel more inspired and confident as a parent Want to know how to raise an emotional and socially intelligent child This book is the right one

**Research & Action Report**,2002

**Emotional Intelligence for Kids** Samantha Wiggins,2012-04-10 Emotional intelligence is the safest most effective mean to live a successful life Therefore as a parent or teacher you always need to be interested in improving emotional intelligence in your child Unfortunately this vital part of every child s education is often ignored by common schooling methods You can start by searching for the emotional intelligence definition but most often than not it won t be the answer you need You first need to understand all the principles behind it and then figure out what is emotional intelligence That is why the author starts by detailing emotions and how feelings affect our lives constantly This emotional intelligence book aims to supplement the standard education received by your kid or student by raising awareness about various methods and practices These approaches have been developed during the author s experience in the educational system and through thorough research in the field of child and group psychology Emotional Intelligence for Kids is structured in ten chapters which have been designed in such way that they could provide intensive and pertinent emotional intelligence training for

your kid These chapters will help parents and teachers in achieving a more unconventional educational method focused on exposing children to activities that encourage the expression of emotions It will teach you how to develop emotional intelligence in your kids while providing a solid emotional intelligence appraisal Social skills contribute substantially to an efficient adaptation and integration in the environment we live in Through interactions with others we achieve individual goals We reach them not only through pure cognitive thought but also through emotions through human relationships that push us forward Without emotions and relationships our lives are meaningless Emotional intelligence in the workplace is also vital for your professional career Thus a child s ability to develop relationships with other children until the age of 6 years and above is often more important than having a high IQ Some kids bloom late and some early their cognitive processes start to kick in at different stages in life Developing Emotional intelligence is something that kids must practice starting kindergarten The process of developing social and emotional skills begins as early as the first years of life which is why the quality of interactions with others is crucial You won t find an emotional intelligence test or an emotional intelligence quiz here but rather a collection of emotional intelligence activities described in detail with clear objectives and instructions These activities will be your homework as a parent or tutor something to work on with your child during his learning It is the best emotional intelligence assessment you can make by practicing these activities with your young ones and guiding their reactions and providing constant feedback to them
