Exploring Physical Geography Robert V. Rohli, Professor, Peter Waylen, Professor, Mark Andrew Francek, Professor, Julia Johnson, Stephen Reynolds, 2014-01-17 Stephen Reynolds author of the highly successful Exploring Geology brings his ground breaking visually spectacular approach to Exploring Physical Geography Intended for an introductory geography course such as Physical Geography Reynolds Exploring Physical Geography promotes inquiry and science as an active process It encourages student curiosity and aims to activate existing student knowledge by posing the title of every two page spread and every subsection as a question In addition questions are dispersed throughout the book Integrated into the book are opportunities for students to observe patterns features and examples before the underlying concepts are explained That is we employ a learning cycle approach where student exploration precedes the introduction of geographic terms and the application of knowledge to a new situation Exploring Physical Geography introduces terms after students have an opportunity to observe the feature or concept that is being named This approach is consistent with several educational philosophies including a learning cycle and just in time teaching Research on learning cycles shows that students are more likely to retain a term if they already have a mental image of the thing being named Lawson 2003 Also the figure based approach in this book allows terms to be introduced in their context rather than as a definition that is detached from a visual

representation of the term We introduce new terms in italics rather than in boldface because boldfaced terms on a textbook page cause students to immediately focus mostly on the terms rather than build an understanding of the concepts Featuring more than 2 500 photographs and illustration Exploring Physical Geography engages students with strong visuals unique two page spreads and Before You Leave This Page objectives

Exploring Earth Science Julia Johnson, Stephen Reynolds, 2015-02-06 Exploring Earth Science by Reynolds Johnson is an innovative textbook intended for an introductory college geology course such as Earth Science This ground breaking visually spectacular book was designed from cognitive and educational research on how students think learn and study Nearly all information in the book is built around 2 600 photographs and stunning illustrations rather than being in long blocks of text that are not articulated with figures These annotated illustrations help students visualize geologic processes and concepts and are suited to the way most instructors already teach To alleviate cognitive load and help students focus on one important geologic process or concept at a time the book consists entirely of two page spreads organized into 20 chapters Each two page spread is a self contained block of information about a specific topic emphasizing geologic concepts processes features and approaches These spreads help students learn and organize geologic knowledge in a new and exciting way Inquiry is embedded throughout the book modeling how scientists investigate problems The title of each two page spread and topic heading is a question intended to get readers to think about the topic and become interested and motivated to explore the two page spread for answers Each chapter is a learning cycle which begins with a visually engaging two page spread about a compelling geologic issue Each chapter ends with an Investigation that challenges students with a problem associated with a virtual place The world class media spectacular presentations and assessments are all tightly articulated with the textbook This book is designed to encourage students to observe interpret think critically and engage in authentic inquiry and is highly acclaimed by reviewers instructors and students

Exploring Physical Geography Stephen J. Reynolds, 2024 WE WROTE EXPLORING PHYSICAL GEOGRAPHY so that students could learn from the book on their own freeing up instructors to teach the class in any way they want I Steve Reynolds first identified the need for this type of book while I was a National Association of Geoscience Teachers NAGT distinguished speaker
