Mechanical and Manufacturing Design of Antennas Richard L. Burge, 2025-07-31 Mechanical and Manufacturing Design of Antennas addresses the critical link between an RF design and its successful mechanical implementation This groundbreaking book offers mechanical and manufacturing engineers a roadmap to understanding how physical design directly affects antenna performance Author Richard L Burge provides detailed guidance on design for manufacturability and assembly creating a practical blueprint for bridging the gap between RF intent and mechanical execution This ensures the reader will be able to create antennas that perform exactly as designed both in the lab and in the field Uncover how tolerances materials coatings and assembly precision profoundly affect an antenna's electromagnetic behavior Recognize how component interfaces alignment errors and physical assembly can introduce unanticipated variances in RF behavior Walk through common performance degradations caused by physical misalignments improperly supported apertures and unaccounted for environmental loads including wind thermal cycling ice buildup and dynamic vibration Mechanical and Manufacturing Design of Antennas addresses how flexing shifting or degrading happens under real world conditions and how to design against such failures Furthermore this book demystifies the critical challenge of tolerancing for antennas by offering specific field tested guidelines that ensure the manufactured components stay within acceptable RF performance limits Learn to identify which tolerances truly matter how to prioritize them and where to relax specifications to reduce cost without sacrificing performance This is an indispensable resource for both mechanical engineers who will gain the

confidence to create manufacturable drawings and RF designers who will better understand how mechanical constraints influence electromagnetic outcomes Whether you are creating prototypes or high volume systems this essential reference will help ensure that your antennas not only perform but do so reliably and economically *Modified Mastering Engineering With Pearson Etext - Access Card - for Machine Design* Robert L. Product Development Christopher A. Mattson, Carl D. Sorensen, 2019-11-30
This book explores the evolution of products from the beginning idea through mass production Rather than prescribing a one size fits all process the authors explain the theory behind product development and challenge readers to develop their own customized development process uniquely suited for their individual situation In addition to theory the book provides development case studies exercises and self evaluation criteria at the end of each chapter and a product development reference that introduces a wide variety of design tools and methods Class tested for three consecutive years by hundreds of students in four different courses the book is an ideal text for senior design classes in mechanical engineering and related disciplines as well as a reference for practicing engineers product designers

Enterprise Interoperability V Raúl Poler, Guy Doumeingts, Bernhard Katzy, Ricardo Chalmeta, 2012-02-24
Within a scenario of globalised markets where the capacity to efficiently cooperate with other firms starts to become essential in order to remain in the market in an economically socially and environmentally cost effective manner it can be seen how the most innovative enterprises are beginning to redesign their business model to become interoperable This goal of interoperability is essential not only from the perspective of the individual enterprise but also in the new business structures that are now emerging such as supply chains virtual enterprises interconnected organisations or extended enterprises as well as in mergers and acquisitions Composed of over 40 papers Enterprise Interoperability V ranges from academic research through case studies to industrial and administrative experience of interoperability The international nature of the authorship continues to broaden Many of the papers have examples and illustrations calculated to deepen understanding and generate new ideas The I ESA 12 Conference from which this book is drawn was organized by Polytechnic University of Valencia on behalf INTERVAL and the European Virtual Laboratory for Enterprise Interoperability INTEROP VLab and sponsored by the International Federation for Information Processing IFIP and the International Federation of Automatic Control IFAC A concise reference to the state of the art in systems interoperability Enterprise Interoperability V will be of great value to engineers and computer scientists working in manufacturing and other process industries and to software engineers and electronic and manufacturing engineers working in the academic environment
