[MATLAB/Simulink Essentials: MATLAB/Simulink for Engineering Problem Solving and Numerical Analysis](#) Sulaymon L. Eshkabilov, 2016-09-30. MATLAB Simulink Essentials is an interactive approach-based guide for students to learn how to employ essential and hands-on tools and functions of the MATLAB and Simulink packages to solve engineering and scientific computer problems which are explained and demonstrated explicitly via examples, exercises, and case studies. The main principle of the book is based on learning by doing and mastering by practicing. It contains hundreds of solved problems with simulation models via M-files, scripts, and Simulink models related to engineering and scientific computing issues. The audience of the book is not only limited to undergraduate students majoring in engineering and scientific computing areas but also postgraduate and research students and practicing engineers in industry and independent learners. There are many hints and pitfalls indicating efficient usage of MATLAB Simulink tools and functions, efficient programming methods, and pinpointing most common errors occurred in programming and using MATLAB's built-in tools and functions and Simulink modeling. Every chapter ends with relevant drill exercises for self-testing purposes. Back cover

**MATLAB and Simulink Student Version R2012a** Mathworks, Inc. Staff, 2012-03-01. Get the essential tools for your courses in engineering, math, and science. MATLAB is a high-level language and interactive environment that lets you focus on your course work and applications rather than on programming details. It enables you to solve many numerical problems in a fraction of the time it takes to write a program in a lower-level language such as Java, C, C++, or Fortran. You can also use MATLAB to analyze and visualize data using automation capabilities, thereby avoiding the manual repetition common with other products. The MATLAB in Student Version provides all the features and capabilities of the professional version of MATLAB software with no limitations. There are a few small differences between the Student Version interface and the professional version of MATLAB. The MATLAB prompt in Student Version is EDU.
