translate into city wide changes engaging with the whole City as Space of Possibilities The book will interest researchers and advanced students in the interdisciplinary fields of urban studies sustainability science sustainability research cultural sciences urban sociology and sociology of the arts cultural sociology and those interested in the transdisciplinary collaborations between the arts academia and civil society [Planning for Greying Cities](#) Tzu-Yuan Stessa Chao,2017-12-06 Planning for Greying Cities Age Friendly City Planning and Design Research and Practice highlights how modern town planning and design act as a positive force for population ageing taking on these challenges from a user oriented perspective Although often related to healthy city concepts the contexts of age friendly cities and communities AFCC were not emphasized until the early 2000s Planning for Greying Cities is the first book to bring together fundamental and cutting edge research exploring dimensions of age friendly cities in different spatial scales Chapters examine the ageing circumstances and challenges in cities communities and rural areas in terms of land use planning urban design transport planning housing disaster resilience and governance and empowerment with international case studies and empirical research results of age friendly environment studies It is essential reading for academics and practitioners in urban planning gerontology transport planning and environmental design **Repurposing the Green Belt in the 21st Century** Peter Bishop,Alona Martinez Perez,Rob Roggema,Lesley Williams,2020-11-09 The green belt has been one of the UK s most consistent and successful planning policies Over the past century it has limited urban sprawl and preserved the countryside around our cities but is it still fit for purpose in a world of unprecedented urban growth and potentially catastrophic climate change Repurposing the Green Belt in the 21st Century examines the history of the green belt in the UK and how it has influenced planning regimes in other countries Despite its undoubted achievements it is time to review the green belt as an instrument of urban planning and landscape design The problem of the ecological impact of cities and the mitigation measures of major climate changes are at the top of the urban agenda across the world Urban agriculture blue and green infrastructures and forestation are the new ecological design imperatives driving urban policymaking **Critical Urban Theory, Common Property, and “the Political”** Dan Webb,2017-05-18 Dan Webb explores an undervalued topic in the formal discipline of Political Theory and political science more broadly the urban as a level of political analysis and political struggles in urban space Because the city and urban space is so prominent in other critical disciplines most notably geography and sociology a driving question of the book is what kind of distinct contribution can political theory make to the already existing critical urban literature The answer is to be found in what Webb calls the properly political approach to understanding political conflict as developed in the work of thinkers like Chantal Mouffe Jodi Dean and Slavoj i ek This properly political analysis is contrasted with and a curative to the predominant ethical or post political understanding of the urban found in so much of the geographical and sociological critical urban theory literature In order to illustrate this primary theoretical argument of the book Webb suggests that common property is the most useful category for conceiving the city as a site of the properly political When the

city and urban space are framed within this theoretical framework critical urbanists are provided a powerful tool for understanding urban political struggles in particular anti gentrification movements in the inner city
