The Lifecycle Of Software Objects Ted Chiang:

The Lifecycle of Software Objects Ted Chiang, 2010 What is the best way to create artificial intelligence In 1950 Alan Turing wrote Many people think that a very abstract activity like the playing of chess would be best It can also be maintained that it is best to provide the machine with the best sense organs that money can buy and then teach it to understand and speak English This process could follow the normal teaching of a child Things would be pointed out and named etc Again I do not know what the right answer is but I think both approaches should be tried The first approach has been tried many times in both science fiction and reality In this new novella at over 30 000 words his longest work to date Ted Chiang offers a detailed imagining of how the second approach might work within the contemporary landscape of startup companies massively multiplayer online gaming and open source software It is a story of two people and the artificial intelligences they helped create following them for more than a decade as they deal with the upgrades and obsolescence that are inevitable in the world of software At the same time it is an examination of the difference between processing power and intelligence and of what it means to have a real relationship with an artificial entity *The Multiverse of Office Fiction* Masaomi Kobayashi, 2022-11-15 The Multiverse of Office Fiction liberates Herman Melville's 1853 classic *Bartleby the Scrivener* from a microcosm of Melville studies namely the so called Bartleby Industry This book aims to illuminate office fiction featuring office workers such as clerks civil servants and company employees as an underexplored genre of fiction by addressing relevant issues such as evolution of office work integration of work and life exploitation of women office workers and representation of the Post Office In achieving this goal Bartleby plays an essential role not as one of the most eccentric characters in literary fiction but rather as one of the most generic characters in office fiction Overall this book demonstrates that Bartleby is a generative figure by incorporating a wide diversity of his cousins as Bartlebys It offers fresh contexts in which to place these characters so that it can ultimately contribute to an ever evolving poetics of the office *Practices of Speculation* Jeanne Cortiel, Christine Hanke, Jan Simon Hutta, Colin Milburn, 2020-12-07 This volume offers innovative ways to think about speculation at a time when anticipation of catastrophe in an apocalyptic mode is the order of the day and shapes public discourse on a global scale It maps an interdisciplinary field of investigation the chapters interrogate hegemonic ways of shaping the present through investments in the future while also looking at speculative practices that reveal transformative potential The twelve contributions explore concrete instances of envisioning the open unknown and affirmative speculative potentials in history literature comics computer games mold research ecosystem science and artistic practice **How to Research Like a Dog** Aaron Schuster, 2024-12-10 A provocative book that proposes a new and surprising inspiration for philosophy today the canine thinker from Kafka's story *Investigations of a Dog* Written toward the end of Kafka's life *Investigations of a Dog* *Forschungen eines Hundes* 1922 is one of the lesser known and most enigmatic works in the author's oeuvre Kafka's tale of philosophical adventure is that of a lone maladjusted dog who challenges the

dogmatism of established science and pioneers an original research program in pursuit of the mysteries of his self and his world In *How to Research Like a Dog* Aaron Schuster uses the canine as a guide dog to rediscover Kafka's fictional universe while taking up the cause of this ingenious possessed melancholy comical and revolutionary thinker Neither an exercise in literary criticism nor a traditional philosophical commentary this charming and idiosyncratic book aligns itself with the research program of Kafka's dog It constructs an impossible system based on the fourfold division of nourishment music incantation and freedom or stated a bit differently enjoyment art institutions and freedom From Plato to Flaubert Lispector and Lacan Schuster puts the dog in dialogue with psychoanalytic theory the history of philosophy and modern literature *Imagining the Unknown* University that Kafka's new science calls for the book enlists new comrades in the dog's struggle
