The Making of Chinese Criminal Law Ying Ji, 2021-03-08 By examining the reasons behind the preventive criminalization of Chinese criminal law this book argues that the shift of criminal law generates popular expectations of legislative participation and meets punitive demands of the public but the expansion of criminal law lacks effective constraints which will keep restricting people s freedom in the future The book is inspired by the eighth amendment of Chinese criminal law in 2011 which amended several penalties related to road drug and environmental safety It is on the eighth amendment that subsequent amendments have been based The amendment stemmed from a series of nationally known incidents that triggered widespread public dissatisfaction with the Chinese criminal justice system Based on John Kingdon s theory of the multiple streams the book explains the origins of the legislative process and its outcomes by examining the role of public opinion policy experts and political actors in the making of Chinese criminal law It argues that in authoritarian China the prominence of risk control through criminal justice methods is a state response to uncertainties generated through reforms under the CCP s leadership

The process of criminal lawmaking has become more responsive and inclusive than ever before even though it remains a consultation with the elites within the framework set by the Chinese Communist Party CCP including representatives of the Lianghui government ministries academics and others The process enhances the CCP s legitimacy by not only generating popular expectations of legislative participation but also by meeting the punitive demands of the public The book will be of interest to academics and researchers in the areas of Chinese criminal law and comparative law **Research Methods in Publishing and Book Studies** Rachel Noorda, Corinna Norrick-Rühl, 2025-09-02 Establishing the unique opportunities and characteristics of doing research in publishing and book studies this book demonstrates and evaluates the range of research methods that are available to students when conducting research within the field Organized into three main parts prefaced by a general introduction to the discipline **Research Methods in Publishing and Book Studies** considers qualitative and quantitative methods and methods of data analysis in turn Each chapter within these sections features Details and logistics of the research method including specific ethical considerations disciplinary history and distinguishing features when compared to other methods Advantages and disadvantages of the method helping students evaluate and choose the right method for their research A case study of the Method in Action written by featured authors with expertise in that area Study questions to help readers test and solidify their knowledge Further reading suggestions By the end of the book students will have a sound understanding of the methods commonly used in book and publishing studies and will be able to confidently identify and select methods for their own research projects and dissertations This book is an essential resource for advanced undergraduate and postgraduate students and researchers in book and publishing studies **Approaches to Qualitative Research** Colleen Conway, 2020-03-02 In this new paperback collection of writing from *The Oxford Handbook of Qualitative Research in American Music Education* scholars examine the characteristics of qualitative research from historical philosophical and theoretical perspectives **ICEMS 2019** Salamah Agung, Dwi Nanto, A. representations of frames via iterative actions of operators in tensor - Jul 24 2022

web nov 1 2023 the purpose of this paper is to study frames generated by iterative actions of operators in tensor product of two hilbert spaces in sect 2 we first illustrate some basic results related to the dynamical representation of frames in hilbert space h later in sect 3 we consider frames in tensor product of two hilbert spaces h_1 and

1 introduction to the tensor product mit opencourseware - Apr 20 2022

web the tensor product $v \otimes w$ is thus defined to be the vector space whose elements are complex linear combinations of elements of the form $v \otimes w$ with $v \in V$ $w \in W$ with the above rules for manipulation the tensor product $v \otimes w$ is the complex vector
