

Ethical Case Studies

Case 1: You would feel angry, because your kidney was wrongfully removed. Surgery is expensive and painful, and may affect you in the future. Even though it was the computer that messed up, we believe that the fault lies with the doctor. The doctor should have had the knowledge and experience to properly diagnose the problem, even without a computer. We would now sue the doctor for failing to do his job, and misinforming the patient. Surgeries such as kidney removal are expensive, so at the very least, we should be given a refund.

Case 2: We believe that using the company's internet and using up the computer's capacity for long periods of time is unacceptable. This is also an illegal use of resources because the Internet access is to aid his work and he/she is not doing their work because they are busy answering personal emails and using the computer capacity for emails instead of its original purpose of storing important work data. We do think that if Worker #1, who doesn't have Internet access at home would only use a minimal amount of time for personal emails and only if the emails stored are detrimental or very important (ex. How his cancer-stricken mother is being treated at her nursing home etc.) then that would be okay. If this was the case then he would have more time to do his work and he would have more space for the work information when frivolous emails weren't taking up storage space.

Case 3: Some of the issues involved with using workplace resources are cost, reputation, and risk. Everything may be paid for at work, but the resources are for work only. You may be known as a good employee, however after using workplace supplies for your own benefit, your reputation will decrease, and you will no longer be known as a good employee. Your superiors will also watch you more closely, and with that there will be an increased risk of you losing your job. It is unacceptable to help your sibling for their wedding. They are asking you to potentially lose your job just so that (s)he will save some cash.

Case 4: The reason why computers are available for students is for an **educational** purpose. Any other purpose is abusing the board's free Internet policy because the resources are being abused. As an ethical standpoint this is taking advantage of a generous free service and using it for other than educational gain. But from a legal standpoint, if it isn't illegal (like distributing drugs via the Internet) then it is **legal**. Law enforcement cannot arrest him/her for misusing government resources but that does not mean this is condonable.

Case 6: You should not help your friend move because it is expensive, you may possibly lose your job, and it takes time. Gas is extremely expensive and your friend lives hours away. Multiple trips will be costly. This may cost you hundreds of dollars, and it is necessary for you to take time off your job to successfully help your friend. Using company goods for your own (or your friends) benefit will result in a possible job loss.

Sustainable Architecture - Between Measurement and Meaning Carmela Cucuzzella, Sherif Goubran,2021-01-05 Each day new articles books and reports present new methods standards and technologies for achieving sustainability in architecture Additionally new materials technological gadgets and data are increasingly considered the staples of architecture s future As we increasingly embrace this techno advancement we must be equally aware that we may be pushing architecture into a managerial science and away from its core concerns such as expression contextuality functionality and aesthetics Sustainable architecture that is

focused on the abstract measurements of consumption energy and emissions loses sight of the vital role that architecture holds in our world it is the field that creates our public spaces and our places of dwelling of business of production of leisure and creation Additionally it fails to comprehend the human dimension of buildings as elements that are deeply connected to their sites historic contexts and that play a key role in defining our social relations and our connection to the spaces we occupy and utilize Sustainable Architecture Between Measurement and Meaning takes a step back to reflect on how sustainability in the built environment can be theorized and practiced critically This book exposes that architecture remains a human and social science that lies at the intersection of measurements and meanings It reveals that sustainable architecture can still operate in a dialectic space of expression rather than serving as a manifesto for either the technical or socio cultural extremes It purports that the human intuition senses and skills still holds the key to unravelling alternative futures of sustainable built spaces And that most importantly humans still have a place in sustainable architecture This book will be of interest to students early career scholars established researchers and practitioners studying sustainability in the built environment It can be used as a referencee to those in the fields of design architecture landscape and urban design urban studies geography social sciences and engineering **Anthropology News** ,2009 **Research EU.** ,2015-02 *Business Periodicals Index* ,2009 Behavioral Medicine A Guide for Clinical Practice 5th Edition Mitchell D. some histories and perspectives that treat those who are younger with kindness and respect This book demonstrates an informed awareness of this history and the ways that old and new ideas can counter current conditions that are harmful to both those who are younger and those who are older while avoiding the reconstitution of the romantic innocent child who needs to be saved by more advanced adults Two interpretations of the upbringing of children are investigated and challenged one suggesting that the poor do not know how to raise their children and thus need help while the other looks at those who are privileged and therefore know how to nurture their young These opposing views have been discussed and problematized for more than thirty years Pedagogies of Kindness and Respect investigates the issue of why this circumstance has continued and even worsened today *Michigan Law Review* ,2011 *Practicing Anthropology* ,2008 Illustrated Ethics Jerry A.
