style with what superb programming looks like To understand the world today we need to understand code and its consequences With Coders Thompson gives a definitive look into the heart of the machine [14th International Conference on Computational Intelligence in Security for Information Systems and 12th International Conference on European Transnational Educational \(CISIS 2021 and ICEUTE 2021\)](#) Juan José Gude Prego, José Gaviria de la Puerta, Pablo García Bringas, Héctor Quintián, Emilio Corchado, 2021-09-21 This book of Advances in Intelligent and Soft Computing contains accepted papers presented at CISIS 2021 and ICEUTE 2021 all conferences held in the beautiful and historic city of Bilbao Spain in September 2021 The aim of the 14th CISIS 2021 conference is to offer a meeting opportunity for academic and industry related researchers belonging to the various vast communities of computational intelligence information security and data mining The need for intelligent flexible behavior by large complex systems especially in mission critical domains is intended to be the catalyst and the aggregation stimulus for the overall event After a through peer review process the CISIS 2021 International Program Committee selected 23 papers which are published in these conference proceedings achieving an acceptance rate of 40% In this relevant edition a special emphasis was put on the organization of special sessions One special session is organized related to relevant topics as follows building trust in ecosystems and ecosystem components In the case of 12th ICEUTE 2021 the International Program Committee selected 17 papers which are published in these conference proceedings One special session is organized related to relevant topics as follows sustainable personal goals engaging students in their learning process The selection of papers is extremely rigorous in order to maintain the high quality of the conference and we would like to thank the members of the program committees for their hard work in the reviewing process This is a crucial process to the creation of a high standard conference and the CISIS and ICEUTE conferences would not exist without their help [Biochemistry](#) John T. Programming Perl 3/E Wall, Larry, Christiansen Tom, Orwant Jon, 2000-01-01 Programming Perl is not just a book about Perl It is also a unique introduction to the language and its culture as one might expect only from its authors Larry Wall is the inventor of Perl and provides a unique perspective on the evolution of Perl and its future direction Tom Christiansen was one of the first champions of the language and lives and breathes the complexities of Perl internals as few other mortals do Jon Orwant is the editor of The Perl Journal which has brought together the Perl community as a common forum for new developments in Perl Any Perl book can show the syntax of Perl's functions but only this one is a comprehensive guide to all the nooks and crannies of the language Any Perl book can explain typeglobs pseudohashes and closures but only this one shows how they really work Any Perl book can say that my is faster than local but only this one explains why Any Perl book can have a title but only this book is affectionately known by all Perl programmers as The Camel
