The Electric Arc Hertha Ayrton, 2012-10-11 Originally published in 1902 this comprehensive exploration of the electric arc represents the cutting edge research of electrical engineer Hertha Ayrton **The Electric Arc**, 2009 *The Electric ARC (Classic Reprint)* Hertha Marks Ayrton, 2017-09-12 Excerpt from *The Electric Arc* Besides the light experiments already mentioned all those on the time change of p d Immediately after starting the arc and after sudden changes of current originally formed part of Prof Ayrton's ill fated Chicago Paper which after being read at the Electrical Congress in 1893 was accidentally burnt in the Secretary's office whilst awaiting publication These highly important experiments were not only the first of their kind but as far as I know they still remain unique Most of the figures in the first chapter all the experiments and curves that relate to cored carbons in the fourth and fifth and some of those on hissing in the tenth also belonged to this Chicago Paper which was as full of suggestion as it was rich in accomplished work About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *The Electric Arc and Its Application to Carbon Arc Lights*, 1946 [Characteristics of the Electric Arc](#) Ippei Kiyohara, 1913

The Electric Arc Hertha Marks Ayrton, 2015-06-25 Excerpt from *The Electric Arc* This book which owes its origin to a series of articles published in *The Electrician* in 1895 has attained to its present proportions almost with the growth of an organic body In experimenting on the arc my aim was not so much to add to the large number of isolated facts that had already been discovered as to form some idea of the bearing of these upon one another and thus to arrive at a clear conception of what takes place in each part of the arc and carbons at every moment The attempt to correlate all the known phenomena and to bind them together into one consistent whole led to the deduction of new facts which when duly tested by experiment became parts of the growing body and themselves opened up fresh questions to be answered in their turn by experiment Thus the subject grew and developed in what might almost be called a natural way About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
