This book shows those companies how to get e-learning implementation right the first time. Don Morrison explores and explains the whole implementation continuum: strategy, vendor selection, technology implementation, culture change, content development, and delivery. Most importantly, he stresses that the success or failure of an e-learning initiative is directly related to the underlying strategic thinking. Written for a more mature second-generation e-learning market, the book provides a practitioner's handbook to both guide the novice and inform the veteran. Focuses on the reader's needs. Focuses on the strategic issues of e-learning. Informed by key business drivers. Supported and endorsed by PwC Readership: Senior managers including CEOs, CIOs, CLOs, HR Directors, middle management responsible for implementing and/or delivering e-learning consultants. *E-development* Robert Schwabe, 2005 Information and communication technologies (ICTs) are increasingly being recognized as essential tools of development. Tools that can empower poor people, enhance skills, increase productivity, and improve governance at all levels. The success of ICT-enabled development or e-development will thus not be measured by the diffusion of technology but by advances in development itself: economic growth and ultimately achievement of the Millennium Development Goals. This volume examines a wide range of issues related to e-development with a focus on the requirements and realities of using ICTs to advance development goals. The report does not attempt to present a comprehensive overview of e-development. Rather, it highlights key issues that have immediate relevance to policy makers in developing nations who make decisions on investments and development goals. It highlights two issues in particular: e-government and e-education because ICT applications in these areas can lead to significant development outcomes and can also be successfully deployed through public-private partnerships, leveraging limited government funding to achieve greater
