- Phonetics is the branch of Linguistics which comprises the study of the sounds of human speech and their production. It is the study of how speech sounds are made or articulated.

There are three basic areas of study:

- Articulatory phonetics: The study of the production of speech sounds by the articulatory and vocal organs by the speaker.
- Acoustic phonetics: The study of the physical transmission of speech sounds from the speaker to the listener.
- Auditory phonetics: The study of the reception and perception of speech sounds by the listener.
