8. Process Workflow

Now we analyze in detail the concept of Process Control.

The process managed by the HFM system can be divided in the following flow:

- Data Loading;
- Processing of the data through the branch of calculations;
- Adjustment;
- Consolidation and Data Combination;
- Approval of Data;
- Lock of the Data.

From the Process Control the user can run branch calculations and check the approval status of the Entity (Company and DCEE) Group under his competence.
