Deep Learning Li Deng, Dong Yu, 2014 Provides an overview of general deep learning methodology and its applications to a variety of signal and information processing tasks Handbook of Pattern Recognition and Computer Vision (5th Edition)

Chi-hau Chen, 2015-12-15 The book provides an up to date and authoritative treatment of pattern recognition and computer vision with chapters written by leaders in the field On the basic methods in pattern recognition and computer vision topics range from statistical pattern recognition to array grammars to projective geometry to skeletonization and shape and texture measures Recognition applications include character recognition and document analysis detection of digital mammograms remote sensing image fusion and analysis of functional magnetic resonance imaging data etc Handbook of Research on Interdisciplinary Perspectives on the Threats and Impacts of Pandemics Omeraki Çekirdekci, Şahver, İngün Karkış, Özlem, Gönültaş, Suna, 2021-11-26 The COVID 19 pandemic shook the world to its core After a brief pause organizations of all kinds had to adapt to the new circumstances given to them with very little time The presence of the pandemic caused multiple threats that caused several disruptions to the norms beliefs and practices in various domains of everyday life Both from macro and micro perspectives individuals households markets institutions and governments developed strategies to respond to the new environment responses that hope to eliminate or at least decrease the threats of the COVID 19 pandemic The Handbook of Research on Interdisciplinary Perspectives on the Threats and Impacts of Pandemics explores the COVID 19 pandemic from an interdisciplinary perspective and determines how future pandemics may impact society Beginning as a health threat the pandemic has led the way to economic social psychological political and informational crises necessitating the examination of the phenomenon from different academic disciplines Covering topics such as distance education human security and predictions this handbook of research is an essential resource for scholars managers media representatives governors health officials government officials policymakers students professors researchers and academicians **Deep Learning Innovations and Their Convergence With Big Data** Karthik, S., Paul, Anand, Karthikeyan, N., 2017-07-13 The expansion of digital data has transformed various sectors of business such as healthcare industrial manufacturing and transportation A new way of solving business problems has emerged through the use of machine learning techniques in conjunction with big data analytics Deep Learning Innovations and Their Convergence With Big Data is a pivotal reference for the latest scholarly research on upcoming trends in data analytics and potential technologies that will facilitate insight in various domains of science industry business and consumer applications Featuring extensive coverage on a broad range of topics and perspectives such as deep neural network domain adaptation modeling and threat detection this book is ideally designed for researchers professionals and students seeking current research on the latest trends in the field of deep learning techniques in big data analytics **Fuzzy Systems and Data Mining IV** Antonio J. Tallón-Ballesteros, Kaicheng Li, 2018-11-15 Big Data Analytics is on the rise in the last years of the current decade Data are overwhelming the

computation capacity of high performance servers Cloud grid edge and fog computing are a few examples of the current hype Computational Intelligence offers two faces to deal with the development of models on the one hand the crisp approach which considers for every variable an exact value and on the other hand the fuzzy focus which copes with values between two boundaries This book presents 114 papers from the 4th International Conference on Fuzzy Systems and Data Mining FSDM 2018 held in Bangkok Thailand from 16 to 19 November 2018 All papers were carefully reviewed by program committee members who took into consideration the breadth and depth of the research topics that fall within the scope of FSDM The acceptance rate was 32.85% Offering a state of the art overview of fuzzy systems and data mining the publication will be of interest to all those whose work involves data science

*Big Data*

Application in Power Systems Reza Arghandeh, Yuxun Zhou, 2017-11-27 Big Data Application in Power Systems brings together experts from academia industry and regulatory agencies who share their understanding and discuss the big data analytics applications for power systems diagnostics operation and control Recent developments in monitoring systems and sensor networks dramatically increase the variety volume and velocity of measurement data in electricity transmission and distribution level The book focuses on rapidly modernizing monitoring systems measurement data availability big data handling and machine learning approaches to process high dimensional heterogeneous and spatiotemporal data The book chapters discuss challenges opportunities success stories and pathways for utilizing big data value in smart grids Provides expert analysis of the latest developments by global authorities Contains detailed references for further reading and extended research Provides additional cross disciplinary lessons learned from broad disciplines such as statistics computer science and bioinformatics Focuses on rapidly modernizing monitoring systems measurement data availability big data handling and machine learning approaches to process high dimensional heterogeneous and spatiotemporal data

*Deep Learning* Siddhartha Bhattacharyya, Vaclav Snasel, Aboul Ella Hassanien, Satadal Saha, B. K. Tripathy, 2020-06-22 This book focuses on the fundamentals of deep learning along with reporting on the current state of art research on deep learning In addition it provides an insight of deep neural networks in action with illustrative coding examples Deep learning is a new area of machine learning research which has been introduced with the objective of moving ML closer to one of its original goals i e artificial intelligence Deep learning was developed as an ML approach to deal with complex input output mappings While traditional methods successfully solve problems where final value is a simple function of input data deep learning techniques are able to capture composite relations between non immediately related fields for example between air pressure recordings and English words millions of pixels and textual description brand related news and future stock prices and almost all real world problems Deep learning is a class of nature inspired machine learning algorithms that uses a cascade of multiple layers of nonlinear processing units for feature extraction and transformation Each successive layer uses the output from the previous layer as input The learning may be supervised e g classification and or unsupervised e g pattern analysis manners These algorithms learn multiple levels of representations that correspond to different levels of abstraction by resorting to some form of gradient descent for training via backpropagation Layers that have been used in deep learning include hidden layers of an artificial neural network and sets of propositional formulas They may also include latent variables organized layer wise in deep generative models such as the nodes in deep belief networks and deep boltzmann machines Deep learning is part of state of the art systems in various disciplines particularly computer vision automatic speech recognition ASR and human action recognition
