

Jurisprudence note.

Jurisprudence is the philosophy of law; it asks questions about why the law exists, how law affects the society and how the society affects the law. It is based on theories, culture, ethics, power, and history. Another important question is what is the purpose of the law.

Key theories in jurisprudence:

A key aspect of positivism is the separation thesis, which argues that law is valid whether it is moral or immoral, or even unjust, and there is no connection between law and morality.

-Inclusive positivism or soft, believes that morality should be part of the law if the legal rules or system allows it.

-Exclusive positivism, or hard, believes that morality should not be part of the law, and the law should be what is written or passed by legal procedures.

Positivism is help in human understanding of the just behavior and the ability to predict outcomes of certain behaviour.

One con of positivism is that legal text could be confusing sometimes to understand and human might be lost in the legal texts.

3- Critical legal theories:

Critical legal theories are legal thoughts that challenge the traditional view of the law; they argue that law is not natural or objective, but it is the reflection of power dynamics and social biases. It also supports the
