Specialized AI tools were used to support the process, such as an author writing program, a cover creator, the Duden correction tool, and an online platform that supports Artificial Intelligence. These programs assisted in the creative process of writing and cover design, but all decisions, ideas, and the entire content came from the author. AI helped ease certain tasks, but it was the human who set the direction and maintained control over the entire process. Without human input and responsibility, this book would never have come into existence. Who is this book for? The curious who want to learn more about AI without technical jargon. People who want to use AI consciously and independently. Beginners, professionals, parents, freelancers, and everyday heroes. Readers who don't just want to marvel but want to understand.
