

Solutions to deforestation

We can limit deforestation and its effects.

Eat less meat and buy sustainable products

Reducing beef consumption by 20% could halve deforestation in the next 30 years. Purchasing sustainable products also minimizes deforestation.

Give indigenous people control of forests

Deforestation is more cost-efficient, and rates are 20% lower where Indigenous people are in charge of the land.

Regulate supply chains for sustainability

40% of tropical deforestation results from the trade of commodities. Making those supply chains sustainable will limit deforestation.

Sustainable forest management

Following a globally recognized certification standard like FSC helps promote sustainable forest management.

Forests, the People, and the Government Renu Khator, 1989 The welfare role of the state has allowed the bureaucracy to venture into new areas of regulation and consequently to assume a leviathanian role in the modern society But what is the cost of this bureaucratic intervention Is regulation cost effective to the society With these questions as the bases of analysis this book examines the outcome of the forest policy process in India An analysis of the

forest policy indicates that the realization of the deforestation problem occurred as early as in the 1860s since then the government has been relying on the regulatory capabilities of the bureaucracy to control the sources of deforestation Regulations it is argued are necessary to restrict the destructive use of forests by the people especially the forest dwellers Contrary to this argument environmentalists blame the corrupt and selfish behaviour of bureaucrats for the damage done to the forests Despite of an extensive legal network nation continues to lose more than one million hectares of forests each year This book provides an statistical analysis of the causes of deforestation in India states After assessing the influence of several independent variables political economic bureaucratic and demographic on deforestation the study concludes that the bureaucracy indeed has failed in its regulatory role "Illegal" Logging and Global Wood Markets ,2004 Instructor's Solutions Manual to Accompany Basic College Mathematics: an Applied Approach, Sixth Edition [by] Aufmann, Barker, Lockwood ,1999 Supplement to Tropical Forest Conservation and Development : a Bibliography Jean Albrecht,1995

Nontimber Forest Products in the United States Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002 A quiet revolution is taking place in America s forests Once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized Now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager This book provides the first comprehensive examination of nontimber forest products NTFPs in the United States illustrating their diverse importance describing the people who harvest them and outlining the steps that are being taken to ensure access to them As the first extensive national overview of NTFP policy and management specific to the United States it brings together research from numerous disciplines and analytical perspectives such as economics mycology history ecology law entomology forestry geography and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products an overview of uses and users and discussions of sustainable management issues associated with ecology cultural traditions forest policy and commerce They examine some of the major social economic and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape from the Pacific Northwest to the Caribbean From honey production to a review of nontimber forest economies still active in the United States such as the Ojibway harvest of plants recounted here the book takes in the whole breadth of recent NTFP issues including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands No other volume offers such a comprehensive overview of NTFPs in North America By examining all aspects of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also
