Systems Development Life Cycle (SDLC): High-impact Strategies - What You Need to Know Kevin Roebuck,2011

The Systems Development Life Cycle SDLC or Software Development Life Cycle in systems engineering information systems and software engineering is the process of creating or altering systems and the models and methodologies that people use to develop these systems The concept generally refers to computer or information systems

Emphasis on this article SLDC is on man made technological life cycle But there are many other life cycle models to choose from This includes ecological life cycles for every life cycle whether biological or technological has a beginning and an end In software engineering the SDLC concept underpins many kinds of software development methodologies These methodologies form the framework for planning and controlling the creation of an information system the software development process This book is your ultimate resource for Systems Development Life Cycle SDLC Here you will find the most up to date information analysis background and everything you need to know In easy to read chapters with extensive references and links to get you to know all there is to know about Systems Development Life Cycle SDLC right away covering Systems Development Life Cycle Software development process Accelerator Software Adaptive Software Development Agile software development Agile Unified Process Application lifecycle management Applied Agile Software Development AspectJ Best Coding Practices Big Design Up Front Cap Gemini SDM Capability Maturity Model Capability Maturity Model Integration CCU Delivery Change control board Chaos model Cleanroom Software Engineering CodeBeamer software Computer programming Crystal Clear software development Development environment DevOps Domain engineering Domain specific multimodeling Dual Vee Model Dynamic Systems Development Method Eating your own dog food Eclipse Buckminster Eclipse Process Framework Egoless programming Endeavour Software Project Management Enterprise Unified Process Envirostructure Essential Unified Process Evolutionary Process for Integrating COTS Based Systems Extreme Programming Extreme programming practices Feature Driven Development Functional specification Goal Driven Software Development Process Google Guice IBM Rational Unified Process IBM Tivoli Unified Process ITUP ICONIX IEC 62304 Incremental build model Information engineering INVEST mnemonic ISO 12207 ISO IEC 15504 Iterative and incremental development Iterfall
