Butti, 1979 Architecture & Sustainable Development (vol.2) Magali Bodart, Arnaud Evrard, 2011-07 This book of Proceedings presents the latest thinking and research in the rapidly evolving world of architecture and sustainable development through 255 selected papers by authors coming from over 60 countries

Geothermal Energy United States. Dept. of Energy. Division of Geothermal Energy, 1983 *Field Guide to Appropriate Technology* Barrett Hazeltine, Christopher Bull, 2003-03-19 Those committed to helping economically disadvantaged people in less developed communities will find all the information they need to provide basic needs such as water systems food sources medical supplies and anything else that enables a community to learn to sustain itself successfully

Sustainable Urbanization Mustafa Ergen, 2016-09-28 The rapid urbanization that began with industrialization has begun to cause many problems New approaches are emerging today to minimize these problems and make urban areas more livable These problems include insufficient social facilities in urban areas for increasing populations due to migration and unbalanced use of green areas water and energy resources due to urbanization Careless consumption and the pollution of natural resources will cause people many more problems in the future than they do today in urban development Many professional disciplines have noticed this unbalanced development in urban areas Urban areas have larger populations than rural areas today Urban areas are developed neglectfully Sustainability is needed as a criterion for urban areas to develop in a more livable and healthy fashion Sustainable urban development approaches are seen in many fields ranging from land use to the use of natural resources in urban areas

Low-tech Magazine 2012-2018 Kris De Decker, 2019-03-18 Low tech Magazine underscores the potential of past and often forgotten technologies and how they can inform sustainable energy practices Sometimes past technologies can be copied without any changes More often interesting possibilities arise when older technology is combined with new knowledge and new materials or when past concepts and traditional knowledge are applied to modern technology Inspiration is also to be found in the so called developing world where resource constraints often lead to inventive low tech solutions

Disaster by Design Michael R. Edelman, Astrid Cerny, Abror Gadaev, 2012-11-27 This volume addresses the impacts of the Aral Sea disaster disappearance of what was the world's fourth largest inland body of water It argues this was the result of deliberate policy decisions This volume is essential reading for everyone concerned

with averting environmental disaster and in creating livable sustainable communities

Technology in Postwar America Carroll W. Pursell, 2007 Carroll Pursell tells the story of the evolution of American technology since World War II His fascinating and surprising history links pop culture icons with landmarks in technological innovation and shows how postwar politics left their mark on everything from television automobiles and genetically engineered crops to contraceptives Tupperware and the Veg O Matic Just as America's domestic and international policies became inextricably linked during the Cold War so did the nation's public and private technologies The spread of the suburbs fed into demands for an interstate highway system which itself became implicated in urban renewal projects Fear of slipping into a postwar economic depression was offset by the creation of a consumer's republic in which buying and using consumer goods became the ultimate act of citizenship and a symbol of an American Way of Life Pursell begins with the events of World War II and the increasing belief that technological progress and the science that supported it held the key to a stronger richer and happier America He looks at the effect of returning American servicemen and servicewomen and the Marshall Plan which sought to integrate Western Europe into America's economic business and technological structure He considers the accumulating problems associated with American technological supremacy which by the end of the 1960s led to a crisis of confidence Pursell concludes with an analysis of how consumer technologies create a cultural understanding that makes political technologies acceptable and even seem inevitable while those same political technologies provide both form and content for the technologies found at home and at work By understanding this history Pursell hopes to advance a better understanding of the postwar American self
