Topic :

the prevailing social problems of Pakistan and the strategies to deal with them.

Poverty

In the context of Pakistan, poverty has been a persistent challenge, affecting a significant portion of the population. **One key factor contributing to poverty in Pakistan is the unequal distribution of wealth and resources. Economic disparities, lack of access to education, and limited employment opportunities in certain regions further exacerbate the issue.**

An incident that highlights the challenges of poverty in Pakistan is the 2010 floods. Massive flooding affected millions of people, destroying homes, crops, and infrastructure. This natural disaster disproportionately affected those already living in poverty, pushing many more into extreme deprivation. The floods not only highlighted the vulnerability of impoverished communities but also exposed weaknesses in the country's infrastructure and disaster management systems.

Additionally, rural areas in Pakistan often face higher levels of poverty compared to urban centers. **Limited access to education, healthcare, and job opportunities in rural settings contributes to a cycle of poverty that can be challenging to break.** The lack of proper infrastructure, such as roads and electricity, also hampers economic development in these regions.

Poverty is on the rise as the [World Bank](#) predicted that by the end of 2023, 37.2% of people will live in poverty (\$3.65/day). The figure is a little lower than the most recent estimate in 2018, which was 39.8%.

The Oxford Handbook of Digital Religion Campbell,2023-11-15 Digital Religion refers to the contemporary practice and understanding of religion in both online and offline contexts and how these contexts intersect with each other Scholars in this growing field recognize that religion has been influenced by its engagement with computer mediated digital spaces including not only the Internet but other emerging technologies such as mobile phones digital wearables virtual reality and artificial intelligence The Oxford Handbook of Digital Religion provides a comprehensive overview of religion as seen and performed through various platforms and cultural spaces created by digital technology The text covers religious interaction with a wide range of digital media forms including social media websites gaming environments virtual and augmented realities and

artificial intelligence and highlights examples of technological engagement and negotiation within the major world religions i.e. Buddhism, Christianity, Hinduism, Islam, and Judaism. Additional sections cover the global manifestations of religious community, identity, ethics, and authority, with a final group of chapters addressing emerging technologies and the future of the field. Because of the interdisciplinary nature of the project, the Handbook is led by co-editors representing the humanistic and social scientific fields of religious studies and communication, though both also have experience in how those disciplines intersect.

Enhancing Financial Inclusion through Islamic Finance, Volume I Abdelrahman Elzahi Saaid Ali, Khalifa Mohamed Ali, Muhammad Khaleequzzaman, 2020-07-01. This book, the first of two volumes, highlights the concept of financial inclusion from the Islamic perspective. An important element of the Sustainable Development Goals (SDGs), financial inclusion has been given significant prominence in reform and development agendas proposed by the United Nations and G 20. The significance of Islamic financial inclusion goes beyond improved access to finance to encompass enhanced access to savings and risk mitigation products, as well as social inclusion that allows individuals and companies to engage more actively in the real economy. It represents one of the important drivers of economic growth. Gender disparity exists within financial access, and its extent varies widely across world economies. South Asia, the Middle East, and North Africa have the largest gender gaps, with women in these regions being forty per cent less likely than men to have a formal account at a financial institution. Analysing how Islamic financial inclusion can empower individuals, this volume explores the contribution of Islamic microfinance in achieving SDGs and solving income and wealth inequality. Comprising a combination of empirical evidence, theory, and modelling, this edited collection illustrates how to improve access to finance, making it essential reading for those researching both Islamic finance and development finance.

Solutions to Water Crises (Related to Actual Interventions) Jenia Mukherjee, Saket Pande, Melissa Haeffner, Sara Marks, Pieter van Oel, Matthew R. Sanderson, Adriana Allen, 2024-01-26. This Research Topic is a part of the Delft 2021 1st Sociohydrology Conference series. To view the other sessions, please follow the links below: Innovating a New Knowledge Base for Water Justice Studies, Hydrosocial Sociohydrology, and Beyond Scale Issues in Human Water Systems, Water Resources and Human Behavior Analysis, and Modeling of Coupled Water-Human Systems: Feedbacks and Coevolution. Innovative Sensing: Observing, Measuring, and Analysing Human Water Data. Pluralistic water research integrates the hydrological and the social to provide sustainable solutions to water crises. While relying upon robust quantitative modelling, sociohydrology captures crises across many waters: surface, ground, and interstitial, along quantity and quality dimensions. Hydrosocial unfurls power hierarchies in access to safe and required quota of water, be it for drinking or irrigation purposes. The success of engineering solutions, laying out hard interventions such as solar-powered irrigation, dams, high-yielding crop varieties, water treatment plants, and water distributions and purifications, depend on soft socio-political, cultural, and psychological variables like the political landscape, community behaviours, and governance arrangements. How these soft parameters limit or advance the effect of hard

interventions await more enhanced modelling and place based qualitative analyses to disentangle various cause effect pathways While historical and process based sociohydrology accommodates detailed temporal datasets and causal relationships across human water systems the hydrosocial paradigm reconciles non modern anti hegemonic water techniques and knowledge systems animating local agencies within specific hydrosapes This issue is dedicated to capture real time innovations through which water challenges have been confronted It intends to unravel storylines along actionable water projects reflecting on mediations across multiple actors and networks in specific spatio temporal and cultural contexts finally drawing our attention to the correlation between projected promises and actual realities Situated at the crossroads of boundary work we invite articles that will deploy a range of interdisciplinary frameworks like RANAS Risk Attitude Norms Ability and Self regulation APIE Awareness Participation Involvement and Engagement HUPE Historical Urban Political Ecology etc to demonstrate coupled sociohydrological and hydrosocial realities and in turn getting informed by empirical insights emanating from these actual water interventions The final aim of the special issue is not to showcase water just actual interventions but to elicit a rigorous mapping of sustainable processes facilitating collective co production of resilient water trajectories
