Rose Army, 1998-04. **Handbook Global History of Work** Karin Hofmeester, Marcel van der Linden, 2017-11-20. Coffee from East Africa, wine from California, chocolate from the Ivory Coast: all these everyday products are based on labour, often produced under appalling conditions but always involving the combination of various work processes. We are often not aware of what is the day-to-day reality for workers in various parts of the world and how it was in the past. How do they work today and how did they work in the past? These and many other questions comprise the field of the global history of work, a young discipline that is introduced with this handbook. In 8 thematic chapters, this book discusses these aspects of work in a global and long-term perspective, paying attention to several kinds of work: convict labour, slave and wage labour, labour migration, and workers of the textile industry. But also workers' organisation, strikes, and motivations for work are part of this first handbook of global labour history, written by the most renowned scholars of the profession.

Patterns of World History: To 1600 Peter Von Sivers, Charles Desnoyers, George B. Stow, 2025 The response to the first four editions of Patterns of World History has been extraordinarily gratifying to those of us involved in its development The diversity of schools that have adopted the book community colleges as well as state universities small liberal arts schools as well as large private universities suggests to us that its central premise of exploring patterns in world history is both adaptable to a variety of pedagogical environments and congenial to a wide body of instructors Indeed from the responses to the book we have received thus far we expect that the level of writing timeliness and completeness of the material and analytical approach will serve it well as the discipline of world history continues to mature These key strengths are enhanced in the fifth edition of Patterns by constructive dynamic suggestions from the broad range of students and instructors who are using the book It is widely agreed that world history is more than simply the sum of all national histories Likewise Patterns of World History Fifth Edition is more than an unbroken sequence of dates battles rulers and their activities and it is more than the study of isolated stories of change over time Rather in this textbook we endeavor to present in a clear and engaging way how world history works Instead of merely offering a narrative history of the appearance of this or that innovation we present an analysis of the process by which an innovation in one part of the world is diffused and carried to the rest of the globe Instead of focusing on the memorization of people places and events we strive to present important facts in context and draw meaningful connections analyzing whatever patterns we find and drawing conclusions where we can In short we seek to examine the interlocking mechanisms and animating forces of world history without neglecting the human agency behind them
