governments all around the world were faced with a complicated set of options for investing in transport including transport
infrastructure This publication examines main principles for determining the most appropriate models for financing transport
infrastructure expenditures but also illustrates and analyses many innovative ways to finance transport infrastructure
Financing in this context means the provision of money at the time and in the quantity that is needed to meet society s
transport infrastructure and transport service provision needs Thus financing is a basic underpinning of the entire process of
providing and operating transport infrastructure Accepting the view that transport infrastructure is needed to provide a well
defined set of public services at the highest level financing the transport sector including transport infrastructure
expenditures is fundamentally a sovereign task which involves determining how much of the government s available public
resources will be channelled into the transport infrastructure during a given period as opposed to other policy priorities
However this report proves that this is not the case anymore There are many other innovative ways from which transport
infrastructure construction could be funded other than the government s available public resources
