These are Basic Principles, parameters, systems, and applied mathematical models used in the rheological studies. Melt flow analysis of different non-Newtonian fluids in laminar flow, transition between laminar and turbulent flow, and modified Reynolds number. The effects of different physical and molecular parameters on purely viscous rheological response of polymer melts and solutions. Principles of rheometry and different types of viscometers and on-line rheometers. The static and dynamic viscoelastic response of the polymer melts and solutions. Viscoelasticity, mechanical models, and Boltzmann superposition principle. Molecular structure, viscoelasticity, relationship, and linear and non-linear viscoelasticity. Effects of different processes, materials, parameters like temperature, fillers, micro and nano fillers, and molecular parameters like MW, MWD. The role of rheology in polymer processing in different equipment. Modified power law constants and two range power law constants for a large number of polymers. Rheology software program in Java, comparison of different polymer rheological models using the rheology software, and answers to the problems. The book will be very useful to both undergraduate and postgraduate students as well as teachers and practicing rheologists.

**Membrane Technology Enhancement for Environmental Protection and Sustainable Industrial Growth** Zhien Zhang, Wenxiang Zhang, Mohamed Mehdi Chehimi, 2020-12-14 This book presents a detailed discussion of the fundamentals and practical applications of membrane technology enhancement in a range of industrial processes, energy recovery, and resource recycling. To date, most books on the applications of membrane technology have mainly focused on gas pollution removal or industrial wastewater treatment. In contrast, the enhancement of various membrane processes in the areas of energy and the environment has remained largely overlooked. This book highlights recent works and industrial products using membrane technology while also discussing experiments and modeling studies on the membrane enhancement process.
