living beings as well as a template for making sense of biopolitical power that operates on the scale of populations rather than individuals Tarizzo traces population thinking the notion of modular optimization and other conceptual keystones of the current biopolitical regime an ethopolitical regime in the author s terms to their origins in twentieth century biological thought more precisely and critically evolutionary theory Neo Darwinism Tarizzo argues should be seen not only as a scientific paradigm but also as a philosophy per se because it is evolutionary theory that today provides an answer to the old philosophical question What is man This new kind of philosophy his book suggests largely determines the way in which people look at themselves and society Not only does it contribute to designing new technologies of power but it also fosters subjection to the new ethopolitical regime
