

30 Java Technical Questions With Answers

***Q1. How could Java classes direct program messages to the system console, but error messages, say to a file?**

A. The class System has a variable out that represents the standard output, and the variable err that represents the standard error device. By default, they both point at the system console. This how the standard output could be re-directed:
`Stream st = new Stream(new FileOutputStream("output.txt")); System.setErr(st);
System.setOut(st);`

***Q2. What's the difference between an interface and an abstract class?**

A. An abstract class may contain code in method bodies, which is not allowed in an interface. With abstract classes, you have to inherit your class from it and Java does not allow multiple inheritance. On the other hand, you can implement multiple interfaces in your class.

***Q3. Why would you use a synchronized block vs. synchronized method?**

A. Synchronized blocks place locks for shorter periods than synchronized methods.

***Q4. Explain the usage of the keyword transient?**

A. This keyword indicates that the value of this member variable does not have to be serialized with the object. When the class will be de-serialized, this variable will be initialized with a default value of its data type (i.e. zero for integers).

***Q5. How can you force garbage collection?**

A. You can't force GC, but could request it by calling `System.gc()`. JVM does not guarantee that GC will be started immediately.

***Q6. How do you know if an explicit object casting is needed?**

A. If you assign a superclass object to a variable of a subclass's data type, you need to do explicit casting. For example:
`Object a; Customer b; b = (Customer) a;`
When you assign a subclass to a variable having a superclass type, the casting is performed automatically.

***Q7. What's the difference between the methods `sleep()` and `wait()`**

A. The code `sleep(1000);` puts thread aside for exactly one second. The code `wait(1000);` causes a wait of up to one second. A thread could stop waiting earlier if it receives the `notify()` or `notifyAll()` call. The method `wait()` is defined in the class `Object` and the method `sleep()` is defined in the class `Thread`.

Java Test Questions And Answers

Kathy Sierra, Bert Bates

Java Test Questions And Answers:

Java Quiz Book S. R. Subramanya, 2020-12-31 This is a quick assessment book quiz book It has a vast collection of questions on Java programming language The topical coverage include data types control structures arrays classes objects and methods inheritance and polymorphism exception handling and stream and text I O , **Adaptive Hypermedia and Adaptive Web-Based Systems** Vincent Wade, Helen Ashman, Barry Smyth, 2006-06-16 Here are the refereed proceedings of the 4th International Conference on Adaptive Hypermedia and Adaptive Web Based Systems AH 2006 held in Dublin Ireland June 2006 The book presents 22 revised full papers and 19 revised short papers together with abstracts of 3 keynotes 12 poster papers and 14 doctoral consortium posters Topics include pioneering theories techniques and innovative technologies to provide dynamic personalization adaptation and contextualization of hypermedia resources and services
