Course Design for TESOL Florin Mihai, Kerry Purmensky, 2016-03-22 Course Design for TESOL offers a unique approach of integrating curriculum with

teaching activities to allow language educators to utilize the text in a variety of courses in a TESOL program. Although the authors assume readers have a basic knowledge of English grammar, this textbook resource is designed to be comprehensible to those who have not had an SLA or Applied Linguistics course. Because each language skill is discussed in detail in terms of important theories and concepts and actual teaching activities are included, the book can also be used in a Methods course or a combined Curriculum Design Methods or Methods and Materials course. Part I explores the basic language acquisition theories and their influences on current teaching practices in the field. Part II then moves on to the core elements of designing a curriculum or course: conducting the needs analysis, setting of course goals/objectives, designing the syllabus, and writing lesson plans. Part III, Instructional Activities and Assessment Techniques, features chapters on the teaching of listening, speaking, reading, writing, grammar, and culture. Within each of these chapters, the authors address the fundamental issues related to the teaching of each skill and then discuss the components of a good activity for that skill and how to design one, and then offer four sample activities, one for each type of syllabus, and guidance on assessing that skill. The activities can be adapted for use in a variety of classrooms and settings. Part IV addresses contemporary trends, curriculum issues in North America and Europe, standards and educational policy practices in teaching in Asia, particularly China and Korea, and technology-enhanced learning.

The book also provides reports on a series of empirical studies on dictionary use in decoding activities, reading comprehension, and L2 L1 translation, which will shed some light on the nature of the issues discussed throughout the book. The book falls into two parts: Part I, Research on Dictionary Use: State of the Art, is as its title suggests a summary of previous studies to tease out relevant issues in each area of inquiry; Part 2, Empirical Studies, reports on a series of studies the author has conducted in the past 15 years. The first three studies (Chapter 5, 6, and 7) investigate dictionary use in the broader context of language learning. The next four studies (Chapter 8, 9, 10, and 11) report on a series of controlled experiments on the relationship between the macro and microstructure of the dictionary and reference skills. Finally, the last two chapters (Chapter 12 and 13) report the use of learner language data for a better lexicographical output.
