for the last 50 years following the famous manuscript by Professor Makkaveev in 1955 Even being published solely in the Russian language the theory and the author of the book Prof Roman Chalov are well known in the World This book consolidates for the first time in English Chalov s work for the global audience The book demonstrates how principles from fluvial geomorphology and hydrology are used to develop an ecosystem approach to river analysis and management Despite a strong tradition in fluvial geomorphology work in the USSR unfortunately little has been made of insights provided on the international stage The fluvial processes theory accepted in USSR was somewhat isolated during the long period of development from the English language literature The studied rivers are mostly located in Northern Eurasia and much different from those described in classical English language works Chalov allows the readers to interconnect two Worlds in Geomorphology building bridges between the classical international geomorphology and the equally in depth and thorough but isolated research in the USSR
