The book that has helped more than 80,000 students and researchers prepare their plan or proposal for a scholarly journal article, dissertation or thesis has been revised and updated while maintaining all the features that made the First Edition so popular. Writing exercises conclude each chapter so that readers can practice the principles learned in the chapter and if all the exercises are completed, have a written plan for their study. In addition, numbered points provide a handy checklist for each step in a process and annotated passages help the reader's comprehension of key research ideas.
