Special Needs and Early Years

Provision Hannah Mortimer, 2001 *Special Needs and Early Years Provision* provides an overview of the current issues including research practice and legislation involved in meeting special educational needs for the early years age group. It aims to promote reflective practice and links theory to practice in an engaging and readable style. The book also relates to children at all levels of special needs rather than focusing on the more severe cases. Numerous examples are provided from a variety of early years settings and the text is peppered with exercises, pen pictures and summary sections. This thoroughly up to date guide will be valuable to early years practitioners across all sectors. *Early Intervention for Handicapped and At-risk Children* Nancy L. Peterson, 1987 This text is intended for students and professionals in special education, regular early childhood education and related disciplines who are interested in working with young children who have handicapping or at risk conditions before they reach school age. The purpose is to provide a comprehensive overview of the field, its mission and the unique approaches for helping this young clientele. Page vii. *Managing the Preschool Environment* Allen A. Mori, John T. Neisworth, 1982 **Teaching Pupils with Learning Difficulties** Peter Farrell, 1997 Introduces some of the key issues in the education of children with severe learning difficulties. The text provides a definition of SLD and considers assessment, provision, the curriculum, teaching approaches and helping children with challenging behaviour. **Observing Young Children** Sally Wylie, 2004 The main purpose of this text, particularly this edition, is to assist students in developing the skills and knowledge necessary to conduct relevant professional and meaningful observations of young children in the field of Early Childhood Education. The text is designed for college or university students embarking on a career involving young children. *Observing Young Children* includes references to various professions: Teachers, Early Childhood Educators, Early Interventionists and Resource Teachers and Consultants, all of whom use observation in a variety of ways for a diverse number of reasons. Observation is a language they all speak and understand. Uncovering the developmental process of a child's early years and making it visible to others requires the skills and knowledge of a practiced observer. Educators know that one of the best ways to learn about young children is to observe them and the other way is to talk with their families. Through observation and documentation, Educators can co-construct with children and their families a curriculum that is alive with what matters to them. **Preventive intervention in schizophrenia**, 1982 *Young Children with Special Needs* S. Kenneth Thurman, Anne H. Widerstrom, 1985 *Intervention Strategies for High Risk Infants and Young Children* Theodore D. Tjossem, 1976
