

PORTFOLIO SUMMATIVE REFLECTION

SAMPLE

As I reflect upon the four years worth of work in my portfolio, I can't help but feel a sense of accomplishment and pride. My journey through high school has not been without many trials and tribulations; however, I feel that my growth as an individual and student is a direct result of these experiences. The entries I have chosen to include in my showcase portfolio not only demonstrate proficiency in academic skills, such as reading, writing, problem solving, and oral communication, but also illustrate my story of growth. |

Comments: Context set throughout first paragraph – story of growth.

I entered the 9th grade as a somewhat shy student. I always received decent grades in Middle School but my confidence in my academic skills, especially in writing and oral communication, was lacking. I always had a difficult time getting my ideas down on paper and it would take me hours to write a three-paragraph essay. And, as far as getting up in front of the class, I was terrified. My hands would shake, I would sweat profusely, and I could never seem to get the words out without stuttering or losing my train of thought. Therefore, I was a little nervous entering high school, knowing I would be doing these types of work more often and on a bigger scale. I knew it was going to be tough, but I persevered. The first entry in my showcase portfolio is a good example of the humble beginnings of my journey. The entry is my 10th grade Modern World History common task entitled "God, Gold, and Glory" in which I had to write a response to informational text regarding the effects of New World discovery on the native American population. I chose this piece not because it is my best piece of writing, but it was my first piece of writing in high school to meet proficiency. Even though the essay barely met the standard (I still had problems with analyzing the documents beyond their literal meaning), I was

Assessment for Experiential Learning Cecilia Ka Yuk Chan,2022-09-29 Chan's book explores the challenges in assessing experiential learning deepens our

understanding and inspires readers to think critically about the purpose of assessment in experiential learning. Experiential learning has been studied and proven to be effective for student learning particularly for the development of holistic competencies i.e. 21st century skills, soft skills, transferable skills, considered essential for individuals to succeed in the increasingly global and technology infused 21st century society. Universities around the world are now actively organising experiential learning activities or programmes for students to gain enriching and diversified learning experiences however the assessment of these programmes tends to be limited, unclear and contested. Assessment plays a central role in education policies and students' approach to learning. But do educators know how to assess less traditional learning such as service learning, entrepreneurship, cross discipline or cross cultural projects, internships and student exchanges? While the current assessment landscape is replete with assessments that measure knowledge of core content areas such as mathematics, law, languages, science and social studies, there is a lack of assessments and research that focus on holistic competencies. How do we assess students' ability to think critically, problem solve, adapt, self manage and collaborate? Central to the discussion in this book is the reason students are assessed and how they should be assessed to bring out their best learning outcomes. Offering a collection of best assessment practice employed by teachers around the world, this volume brings together both theoretical and empirical research that underpins assessment and perceptions of different stakeholders, understanding of assessment in experiential learning from students, teachers and policymakers. The idea of assessment literacy also plays an important role in experiential learning for example reflection is often used in assessing students in experiential learning but how reflection, literacy, are educators, are they aware of the ethical dilemmas that arise in assessing students? These questions are discussed in detail. The volume also introduces a quality assurance programme to recognise student development within experiential learning programmes. The book will be particularly informative to academic developers, teachers, students and community partners who struggle with the development and assessment for experiential learning, those who plan to apply for funding in experiential learning and policymakers and senior managements seeking evidence and advice on fine tuning curricular assessment designs and quality assurance. From Proficiency to Authenticity Patricia K. Kubow, Robert DeBard, 2002. *From Proficiency to Authenticity: A Holistic School Development Assessment Plan*. [The American Biology Teacher](#), 2004.

Learning and Practice Patricia Murphy, Kathy Hall, 2008-07-18. By examining ideas about learning that transcend typical boundaries such as school, workplace or home school, this book emphasises the socially negotiated and embedded nature of meaning making and how learners learn to use the cognitive tools of their cultural community through participation in social activity. The editors argue that this is the means by which individual agency is extended and learners' identities as forms of competency are transformed. The book locates sociocultural understanding in a wide theoretical frame and demonstrates its implications for learning and assessment.

generally covering a range of educational and workplace settings The contributions challenge ways of understanding learning and thinking about practice both teaching and assessment Drawing on the international literature this book is essential reading for students of curriculum learning and assesment in all sectors from pre primary to further and higher education It is suitable as a core text for masters and taught doctorate programmes It will be of interest to a range of professionals involved with curriculum learning and the practice of teaching and assessment It is also relevant to those in work based and professional education and training and informal educational settings A unique collection in a field that is underrepresented it will also be of interest to an acadmeic audience
